General features
- 12707, 12708 – On the review side, the ability to recall a correction notice and the view correction notice history.
• **12709** – Request additional payment as part of a correction.

• **12830** – Ability to View Notifications, which were sent by the system.
BWEW - Chapter 105

- **12711** – In each module for the customer's specific General Permit, there is a grid of Impacts. Currently, the applicant may associate one or more structures with the impact and those structures will show back on the General Permit module in a column. The column (highlighted below) will be displayed in the grid.

![Impacts Grid](image)

- **13986, 12713, 13979** – The Chapter 105 Minor Revision.
- **12719** – On the review side, quick search by APS Number.

![eReview - Dashboard](image)

- **12716** – On the review side, the Regional/District Office Overview tab.

- **13735 (Reported Bug)** – The lead reviewer will receive an email notification when they are assigned as lead reviewer.
- **12829** – On the review side, the Withdraw Request Task will not require other tasks to be completed beforehand (no prerequisites).
Oil & Gas – Subsurface and Surface

- **12718** – A business rule that requires a match between the number of wellbores in the textbox to the number of grid rows.

- **14304** – Logic for selecting WellPad/Site Identification in UDW and CDOW, as well as Site Information in ESCGP Auths:
  - User selects a County where the ESCGP is located:
    - User is presented with a list of Clients that have at least one EXCGP in the selected County.
    - User is presented with a list of ESCGPs that the select Client has in the selected County.

- **10315** – Subsurface Alteration created from an original submitted via e-permitting should copy all line items.
