

2nd Annual

Northeast Sustainable Communities Workshop

June 17, 2010

Newark, NJ (New Jersey Institute of Technology)

The 2nd Annual Northeast Sustainable Communities Workshop will focus on brownfields redevelopment and its intersection with sustainability.

The exciting and informative workshop topics include:

- Real Time Challenges Still Facing Key Stakeholders in Sustainable Development
- Impact of Multi-Site Brownfield Programs
- Transit-Oriented Development, LEED Neighborhood Development, Sustainable Community Design
- The Way for Sustainable Redevelopment: Regional Regulatory Innovations
- Growing Green: Community Efforts to Become Sustainable
- Renewable Energy: Powering Your Brownfields
- Growing Green Cities: Sustainable Models of Urban Agriculture
- Green Standards - Green Remediation
- Green Jobs, Local Jobs: Where are They?
- Going Local: Building Sustainable Communities from the Ground Up

Vision Statement

It is intended that the workshop will not simply add 'sustainability' to the list of issues related to Brownfields but will look deeply at the interconnections and confluences that make for creating sustainable communities through Brownfields redevelopment. Brownfields are uniquely suited to be a place for sustainable redevelopment to grow. The program for this workshop is intended to be one day of intensive, high energy exchanges between stakeholders sharing varied perspectives on the issues surrounding Brownfields and sustainability. Stakeholder perspectives that include real estate finance, government at all levels, corporations, community representatives, NGOs and consultants who provide a range of technical expertise will participate in interactive sessions that focus on best practices and the challenges to their implementation. The focus will be on problem-solving. ****The workshop has been approved for 8 AICP credits from the American Planning Association.****
