PROJECT COST:
$1,502,088.07 (Final Amount), $1,498,828.24 (Bid Amount)

PROJECT AREA:
90 Acres

PURPOSE:
To eliminate eligible abandoned mine public health and safety hazards that are located within close proximity to places of intense visitation of humans.

DESCRIPTION:
The Bennetts Branch Project eliminated one dangerous highwall which was 10,600 linear feet long with an average height of 60 feet. The parent spoil area was utilized as backfill and regraded by a dragline excavator to reclaim the dangerous highwall. The dangerous highwall was located within 1,000 feet from a township road, T-410, Redwood Avenue. Visitation to the site was evident by the large number of hunter’s shotgun shells, horse riding trails, and all-terrain vehicle tracks. The dangerous abandoned mine feature was located within Problem Area 0522 (PA 0522), which is referenced within the Weedville 7.5 Minute
USGS Quadrangle Map. This dangerous condition was a direct result of surface mining performed in 1971 by the Bennett Coal Company. The dangerous abandoned mine feature met the Office of Surface Mining’s (OSM’s) Priority 2 safety criteria.

**Funding:**  Pennsylvania Abandoned Mine Land Grant

**Project Management:**  Bureau of Abandoned Mine Reclamation
