- c. an acceptable certificate of qualification issued by another state.

#### **HOW TO CALCULATE ELIGIBLE EXPERIENCE**

The Commonwealth of Pennsylvania, Department of Environmental Protection, provides this information to assist you in determining whether you are eligible for the Mine Official Certification Examination.

"Working section" means "within one thousand (1,000) feet of the face."

#### How to count a year -

A year of work means that you were employed doing work underground in a mine for a full year and that you actually worked underground for at least 240 days within that calendar year.

#### You should:

- Count each day you worked as one individual day, even if you worked more than one shift on that day.
- Count only days when you worked underground.
- Not count days when you worked on the surface.
- Not count days when you did not work because of illness, injury, vacation, strike, or education.

#### **Examples:**

- 1. You were employed on October 1 and worked 35 days between October 1 and November 20. On November 21, you became ill and did not return to work until February 1. None of the days between November 20 and February 1 would count toward your one-year calculation. You were not available for work for 72 days which would extend your one-year calculation from October 1 by 72 days.
- 2. You were employed on January 15 and you worked six days a week for forty (40) weeks, without interruption. By November 15 you have already worked 240 days underground; you must continue working until January 15 of the next year to meet the one-year requirement.
