Re: Equipment approval for Brookville Model 1044TC Tractor equipped with a Deutz MWM 916-6 diesel engine and DST exhaust after-treatment system.

**BOTE - DEES - 000299**  
**VENTILATION RATE 3868 CFM**

Dear Mr. Saver:

We have completed our evaluation of the equipment noted above, and approve its use in all bituminous underground coal mines of Pennsylvania. The equipment meets the legal requirements of the *Pennsylvania Bituminous Coal Mine Act*.

Pennsylvania approval number BOTE-D 1769-99 has been assigned to the equipment, in addition to a Pennsylvania Ventilation Rate of 3868 CFM. This approval number and ventilation rate must appear conspicuously on the outside of the subject equipment on a 2" x 4" rust-resistant metal plate. The approval plate should read "Commonwealth of Pennsylvania", "Approval No. BOTE-D 1769-99", and "Pennsylvania Ventilation Rate 3868 CFM". The plate and lettering should be resistant to removal by abrasion.

The general specifications of the Diesel-Powered Equipment Package as approved by letter dated December 14, must be strictly adhered to and include a new exhaust gas shut-down temperature of 285 degrees Fahrenheit. A copy is enclosed.

If you want to make changes or alterations on this equipment approved under BOTE-D 1769-99, a written request outlining the proposed changes, together with any related prints or drawings, must be submitted to this office for approval. If you have any questions, please contact me at the above telephone number or e-mail me at [stickler.richard@dep.state.pa.us](mailto:stickler.richard@dep.state.pa.us).

Sincerely,

Richard E. Stickler  
Director  
Bureau of Deep Mine Safety
