[REDACTED]

Re: Act 223, Section 208 Determination  
Complaint No. 260999  
Clymer Twp., Tioga County

Dear [REDACTED]

The Department has investigated the degradation of your water supply in response to your February 9, 2009, complaint that recent gas well drilling activities conducted by Dominion Transmission, Inc. had affected your spring.

On February 10 and March 16, 2009, the Department collected water samples from the well at your property. The analytical reports for these samples are included, as well as documents that will assist you with interpreting the sample results. The sample results indicate, and therefore the Department has determined, that your water supply has been affected by drilling activities conducted by Dominion Transmission, Inc.

The Department is in the process of working with Dominion Transmission, Inc. in an effort to resolve this matter.

In the meantime, if you have any questions or concerns, please call me a 570-327-0535.

Sincerely,

Richard F. Hall  
Water Quality Specialist  
Oil and Gas Management

Re: Act 223, Section 208 Determination  
Complaint No: 260999  
Clymer Twp., Tioga County

Dear

Enclosed are the analytical reports associated with the most recent water samples that the Department collected from your well, along with documents that will assist you with interpreting the sample results. Dominion Transmission, Inc. (Dominion) has agreed in writing to install water treatment to restore the quality of your water. Dominion has informed the Department that they will contact you soon so that they can arrange to have a water treatment firm assess your water well. Dominion anticipates completing the water treatment system installation in September of 2009.

In the meantime, if you have any questions or concerns, please call me a 570-327-0535.

Sincerely,

Richard F. Hall  
Water Quality Specialist  
Oil and Gas Management
