RE: Sedat #3A Mechanical Integrity Review

REMARKS: I have reviewed the Well Records for the Sedat 3A and they show that the casings are cemented To the surface. I also reviewed the following MIA reports, OG MIA-003-21223-2014, 2015, 2016, AND 2017. The MIA reports were in order and showed that there were no defective casing or cement.
