WATERWAYS

Dear Mr. Garq,

Because the Atlantic Sunrise pipeline will damage waterways, wetlands, and the life they nurture, I implore you to deny water quality certification for this project.

And before any decision is handed down, please assure those of us impacted by this line the right to a public hearing, which I hope is a high priority for you.

I appreciate your consideration, and hope that you are as concerned as I am about leaving our environment safe, healthful, and beautiful for our children.

Sincerely,
Marion Meneface
