

KVL - HL - Linde Corp

- Greener

X All like PA DEP to approve

Chapter 102

105 permits

This hearing is about A+L Service

- but really - its about our future

- one question - will we need more energy

or less - in future

- Well need more - should kept abt by contract

- Benard would do it alone

- They're 14% of our energy

- only lights the lights one day/week

BUT GREENER DAYS ARE COMING

last year - Nat gas overtook coal as energy

electric generation grid

- We use more Nat gas now than coal

- No matter what our president wants

Nowhere is that report bigger than PSU

Nov 2016 - 3250 coal trucks / yr - 10/day

Nov 2016 - 325 trucks of coal ash out / day

All ~~of~~ over the East - gas + electric prices

- falling

- so is production

Nat gas is the cheapest fossil fuel

- its cheap

Abundant

Domestic

Marcellus Shale gas is the big play for the future

Forecast to supply > 50% our Nat gas

July 2020

lets approve this + head for the future
