BRADFORD COUNTY GAS LINES – BREAKDOWN

Transport Lines

Tennessee Pipeline – 24" – 41 Miles

Tennessee Loop 317 – 30" – 23 Miles

Tennessee Loop 319 – 30" – 2 Miles

Total Tennessee Pipeline – 66 Miles

Gathering Lines - Built

6" Lines – 148 Miles

8" Lines – 62 Miles

10" Lines – 83 Miles

12" Lines – 286 Miles

16" Lines – 152 Miles

20" Lines – 45 Miles

24" Lines – 47 Miles

Built Gathering Lines Total – 823 Miles

Proposed Gathering Lines – 201 Miles

Laid in a line we would reach Ft.

With Billions of cubic feet of gas flowing through Bradford county a year and with over 1000 miles of installed and proposed gas lines in Bradford county constructed and being built with virtually no problems. In fact the gas lines were installed with the help of neighbor helping neighbor and citizens helping their community, State and Nation it is important to note that Natural gas Pipelines can be installed with little or no issues.

The Tennessee pipe line has been in Bradford county for 50 years and has been across my Uncle's farm the entire time. Recently additional 36" line or a "loop" was installed with no problems or opposition to increase the flow of natural gas. It was done quickly, safely and has billions of cubic feet flowing through it yearly. In fact most people in our county doesn't know it even exists or where it is located.

My home has a pipe line across it with no problems. We cut hay from above it. I do not own the mineral rights and I am very happy to do my part for all the citizens and users of Natural gas.

We see wildlife using the pipeline for feeding and bedding. The wildlife has benefited from it.

Pennsylvania needs to be able to move gas to create jobs to have low energy prices for home use and for a very healthy tax revenue that benefits all of Pennsylvania.

I will conclude with the Patriotic part of our God given resource. Energy is a Geo political weapon. As we see the terrorism accross the globe and right here in our country we must understand that these coward murders are funded through middle eastern energy. We can all do our

part in combating them by energy independence, and taking away their money that supports their evil attack on innocent women and children.

I would like to thank you for letting me speak today and ask that DEP approve the Chapter 102 and 105 permits. We need to get the Atlantic Sunrise project under construction, for our communities our state and our nation.
