What We Have Accomplished: Population Health

Public Health 3.0 Echo Events - Making Your Community Work For You

Where we live, learn, work, and play often has a larger impact on our health than our DNA (genetic code).

As a society, we have a collective responsibility to create conditions that allow all members of our communities to live healthy lives.

PH 3.0 fosters collaborations among various sectors (e.g. business, education, housing, transportation, local government, among others) to improve health outcomes.

Sustainability

Hub-and-spoke models are set up in each county of focus to build economies of scale by keeping decisions and resources at the local community level. In this model, hub organizations provide spokes with technical assistance, and report in activities of the spokes quarterly to the Department of Health. The spoke organizations implement strategies at the local level; and, the Department provides technical assistance and shares best practices.
