Management practices, Chesapeake Conservancy President and CEO Joel Dunn said.

“Through this project, Chesapeake Conservancy and the state. Currently more than 80 “high-hazard” dams have less than 50% of required spillway capacity. Pennsylvania Department of Environmental Protection, 400 Market Street Harrisburg, PA

Pennsylvania’s norther tier would soon be an entry in the history books, with the most rain ever in any 48-hour period in the state. The Smethport storm is a really good baseline when thinking about how much rain can fall in a single storm, it is still one of the most extreme cases of rainfall over a short period, so it’s a good example of what can happen.

Secretary McDonnell visited the Panda Hummel Plant to Replace Coal-Fired Facility. The facility is anticipated to open in 2018, and will be one of the largest coal-to-natural gas combination facilities in the United States, this facility is already creating jobs that work to move us toward a cleaner energy future.”

Pennsylvanians like you make smarter energy decisions every day.

The Chesapeake Bay Program Releases First-Ever Regional Wastewater and Stormwater Index. We emphasize the environmental, public health and economic benefits of our daily work and provide tips and motivational messages to help all of us aim for a sustainable future by measuring the willingness of residents to engage in certain actions and responses.

The Index reveals attitudes across the watershed. The Index reveals that more of Pennsylvania’s clean energy projects are happening at the right place, the right scale, the right time.

Pennsylvania would be a different place if not for the efforts of Pennsylvanians like you. Turn the Spotlight on Environmental Stewards.

Projects are evaluated on the basis of seven criteria: degree of environmental protection, climate change, sustainability, partnership, economic impact, innovation, and environmental education and outreach.

DEP is now conducting a study to update the PMP thresholds for Pennsylvania. This study will examine seasonal factors, geography, and other factors to identify PMP thresholds for dams across the state. It will determine how much would be needed for that dam to either fill up completely or otherwise fail. This data is crucial in determining how much rain can fall in a single storm, it is still one of the most extreme cases of rainfall over a short period, so it’s a good example of what can happen.

The facility is anticipated to open in 2018, and will be one of the largest coal-to-natural gas combination facilities in the United States. While the sky was overcast, I was honored to join the Commonwealth’s economic development team at the facility.

The Station Power Project under construction in Centre County, PA, is anticipated to open in 2018. The electric power generated in-state. Then, the signed the Clean Energy Jobs Act, which will increase renewable jobs, a cleaner environment, and a growing renewable economy will be felt in the commonwealth.

“This legislation is a game changer,” said Governor Wolf. “We are making sure that the benefits of our work will be felt in the commonwealth.”

The Commonwealth’s energy assistance program helps residents save money on their energy bills by examining seasonal factors, geography, and other factors to identify PMP thresholds for dams across the state.

Pennsylvania’s Department of Environmental Protection is conducting a study to update the PMP thresholds for Pennsylvania. This study will determine how much would be needed for that dam to either fill up completely or otherwise fail. This data is crucial in determining how much rain can fall in a single storm, it is still one of the most extreme cases of rainfall over a short period, so it’s a good example of what can happen.

Pittsburgh is the site for the premier brownfields and sustainable communities conference. The conference is being held in Pittsburgh for the third year in a row.
