

**MERCURY DEPOSITION IN PENNSYLVANIA:
2006 STATUS REPORT**

James A. Lynch, Ph.D.
Professor Emeritus of Forest Hydrology
School of Forest Resources

Kevin S. Horner
Senior Research Technologist
Environmental Resources Research Institute

Jeffrey W. Grimm
Research Assistant
Environmental Resources Research Institute

Hunter C. Carrick, Ph.D.
Associate Professor of Aquatic Ecology
School of Forest Resources

Elizabeth Boyer, Ph.D.
Associate Professor of Water Resources
School of Forest Resources

The work upon which this report is based was supported by funds from the Pennsylvania Department of Environmental Protection through Contract Number ME359494.

This publication is available in alternative media upon request.

The Pennsylvania State University is committed to the policy that all persons shall have equal access to programs, facilities, admission, and employment without regard to personal characteristics not related to ability, performance, or qualification as determined by University policy or by state or federal authorities. It is the policy of the University to maintain an academic and work environment free of discrimination, including harassment. The Pennsylvania State University prohibits discrimination and harassment against any person because of age, ancestry, color, disability or handicap, national origin, race, religious creed, sex, sexual orientation, or veteran status. Discrimination or harassment against faculty, staff, or students will not be tolerated at The Pennsylvania State University. Direct all inquiries regarding the nondiscrimination policy to the Affirmative Action Director, The Pennsylvania State University, 328 Boucke Building, University Park, PA 16802-5901; Tel. (814) 865-4700/V, 814-863-1150/TTY

Table of Contents

	Page
List of Tables	ii
List of Figures	iv
Introduction.....	1
Forms of Mercury	1
Mercury Emissions	2
Mercury Deposition	4
Environmental Concerns.....	5
The Mercury Deposition Network	9
Network Design and Operation	9
Sampling Site Locations	11
Sampling Protocols	13
Sample Types.....	14
Glassware Preparation	14
Laboratory Analysis.....	15
The Standard Sampling Period	15
Quality Assurance Samples	16
Data Completeness Criteria	16
Summary Periods.....	16
Results and Discussions.....	17
Network Performance	17
Total Mercury Concentrations	20
Estimated Wet Total Mercury Depositions.....	30
Seasonal Total Mercury Deposition Patterns.....	34
Total Mercury Concentrations	34
Total Mercury Wet Deposition	38
Mercury Emissions versus Total Mercury Deposition	39
Correlation and Stepwise Regression Analyses.....	44
Trends in Total Mercury Deposition.....	50
Summary.....	61
References.....	68
Appendix I. Weekly Total Mercury Concentrations and Wet Depositions at NADP/MDN Monitoring Sites in Pennsylvania from January 2005 through April 2007	72

List of Tables

Table	Page
1. Location of National Atmospheric Deposition Program/Mercury Deposition Network (NADP/MDN) sites in Pennsylvania in 2005 and 2006	11
2. Annual summary of weekly sampling periods indicating the number and distribution of sample types and quality at each Mercury Deposition Network site in Pennsylvania from 1997 through 2006	18
3. Maximum and minimum weekly total mercury concentrations (ng/L) and wet depositions ($\mu\text{g}/\text{m}^2$) at eight Mercury Deposition Network (MDN) sites in Pennsylvania from 1997 through December 2006	21
4. Mean annual and seasonal volume-weighted total mercury concentrations (ng/L) in precipitation at eight Pennsylvania Mercury Deposition Network sites from 1997 through 2006. Seasonal means are based on weekly samples collected from December-February (winter) March-May (spring), June-August (summer), and September-November (fall). Annual values are presented for both climatic (December-November) and calendar years (January-December).....	23
5. Annual and seasonal total mercury wet depositions ($\mu\text{g}/\text{m}^2$) at eight Pennsylvania Mercury Deposition Network sites from 1997 through 2006. Seasonal depositions are based on weekly samples collected from December- February (winter) March-May (spring), June-August (summer), and September-November (fall). Annual values are presented for both climatic (December-November) and calendar years (January-December).....	31
6. Pearson correlation coefficients (r) between total mercury and the major cation and anion concentrations in precipitation as measured at eight Pennsylvania collocated mercury (MDN) and acid rain monitoring sites. All concentrations were log transformed. Precipitation volume was transformed by taking its square root.....	47
7. Summary of stepwise regression analysis with dependent variable \log_{10} Mercury concentrations and \log_{10} transformed major cation and anion concentrations in precipitation collected at eight Pennsylvania collocated mercury (MDN) and acid rain monitoring sites. All variables in each model are significant at the 0.050 level	49
8. Pearson correlation coefficients (r) between wet total mercury deposition and cation and anion wet depositions as measured at eight Pennsylvania collocated Mercury (MDN) and acid rain monitoring sites. All depositions were log transformed. Precipitation volume was transformed by taking its square root	51

Table

Page

9. Summary of stepwise regression analysis with dependent variable \log_{10} wet total mercury deposition and the \log_{10} transformed major cation and anion wet depositions as measured at eight Pennsylvania collocated mercury (MDN) and acid rain monitoring sites. All variables in each model are significant at the 0.050 level 52

List of Figures

Figure	Page
1. Total mercury deposition simulation for the United States and southern Canada using the Regional Lagrangian Model of Air Pollution (EUEC, 2005)	6
2. Fish consumption advisories due to mercury levels in surface waters of the United States as of December 2004 (U.S. EPA, 2004).....	8
3. Location of active and inactive National Atmospheric Deposition Program/Mercury Deposition Network (NADP/MDN) sites in the United States and southern Canada as of November 2007	10
4. Location of active National Atmospheric Deposition Program/Mercury Deposition Network (NADP/MDN) sites in Pennsylvania in 2005 and 2006	12
5. Volume-weighted mean annual total mercury concentrations (ng/L) and estimated wet depositions ($\mu\text{g}/\text{m}^2$) at all Mercury Deposition Network sites in the United States and southern Canada that met NADP/MDN's 75% data completeness criteria in 2005.....	25
6. Spatial interpolation of 2005 volume-weighted mean annual total mercury concentrations (ng/L) and estimated wet depositions ($\mu\text{g}/\text{m}^2$) based on data from Mercury Deposition Network sites in Pennsylvania and peripheral states	27
7. Volume-weighted mean annual total mercury concentrations (ng/L) and estimated wet depositions ($\mu\text{g}/\text{m}^2$) at all Mercury Deposition Network sites in the United States and southern Canada that met NADP/MDN's 75% data completeness criteria in 2006.....	25
8. Spatial interpolation of 2006 volume-weighted mean annual total mercury concentrations (ng/L) and estimated wet depositions ($\mu\text{g}/\text{m}^2$) based on data from Mercury Deposition Network sites in Pennsylvania and peripheral states	29
9. Seasonal variations in volume-weighted mean total mercury concentrations (ng/L) across Pennsylvania in 2005	35
10. Seasonal variations in volume-weighted mean total mercury concentrations (ng/L) across Pennsylvania in 2006	36
11. Seasonal variations in total mercury wet depositions ($\mu\text{g}/\text{m}^2$) across Pennsylvania in 2005.	40
12. Seasonal variations in total mercury wet depositions ($\mu\text{g}/\text{m}^2$) across Pennsylvania in 2006	41

Figure	Page
13. Location of annual mercury emissions (tons/year) at major point sources in Pennsylvania in 2003 through 2006.....	42
14. County summary of annual mercury emissions (tons/year) at major point sources in Pennsylvania in 2003 through 2006.....	43
15. Spatial interpolations of volume-weighted mean annual total mercury concentrations (ng/L) across Pennsylvania in 2003 through 2006	45
16. Spatial interpolation of annual total mercury wet depositions ($\mu\text{g}/\text{m}^2$) across Pennsylvania in 2003 through 2006.....	46
17. Seasonal trends in total mercury concentrations and precipitation at the Hills Creek State Park MDN site in Tioga County Pennsylvania from 1997 through 2006.....	53
18. Seasonal trends in total mercury wet depositions and precipitation at the Hills Creek State Park MDN site in Tioga County Pennsylvania from 1997 through 2006.....	54
19. Seasonal trends in total mercury concentrations and precipitation at the Allegheny-Portage NHS MDN site in Cambria County Pennsylvania from 1997 through 2006	55
20. Seasonal trends in total mercury wet depositions and precipitation at the Allegheny-Portage NHS MDN site in Cambria County Pennsylvania from 1997 through 2006	56
21. Seasonal trends in total mercury concentrations and precipitation at the Holbrook MDN site in Greene County Pennsylvania from 2000 through 2006	57
22. Seasonal trends in total mercury wet depositions and precipitation at the Holbrook MDN site in Greene County Pennsylvania from 2000 through 2006.....	58
23. Seasonal trends in total mercury concentrations and precipitation at the Valley Forge MDN site in Montgomery County Pennsylvania from 2000 through 2006	59
24. Seasonal trends in total mercury wet deposition and precipitation at the Valley Forge MDN site in Montgomery County Pennsylvania from 2000 through 2006	60
25. Trends in total mercury and sulfate concentrations at the Hills Creek MDN site (PA90) from 1997 through 2006.....	62
26. Trends in total mercury and sulfate concentrations at the Allegheny-Portage MDN site (PA13) from 1997 through 2006.....	63

Figure	Page
27. Trends in total mercury and sulfate concentrations at the Holbrook MDN site (PA37) from 2000 through 2006. Sulfate concentrations were measured at the nearby Laurel Hill PADM site	64
28. Trends in total mercury and sulfate concentrations at the Valley Forge MDN site (PA60) from 2000 through 2006.....	65
