Greetings, educators! I’m so happy to be joining the DEP Environmental Education Center as Project Learning Tree is a national curriculum to help educators teach the importance of forests to our students. Our role is to support educators in their efforts to incorporate environmental education into their classrooms through hands-on, easy to use, and fun. Workshop participants will experience several activities focused on what it means to become a Project Learning Tree educator.

**Project Learning Tree Educator Workshop, Oct. 12, Cumberland County**
Free; includes lunch and snacks. Act 48 hours will be provided by DCNR-PA State Parks.

This workshop will provide lessons and activities for environmental education on a secondary level and up! Participants will gain a better understanding of what Project Learning Tree is, what it can provide for their school, and how to get started. There will be plenty of hands-on, fun, and ready-to-use ideas for everyone!
