I. Executive Summary

In accordance with the requirements of Section 4.11(b) of the commonwealth's Surface Mining Conservation and Reclamation Act (SMCRA) regarding the Department of Environmental Protection's (DEP) reclamation and remining programs, this report is submitted to the Senate Environmental Resources and Energy Committee and to the House Environmental Resources and Energy Committee. This report provides the status of the DEP's reclamation and remining programs authorized under the SMCRA Sections 4.8, 4.9, 4.10, 4.12, 4.13, and 18. Information is current to Dec. 31, 2014.

Since its inception, Pennsylvania's reclamation and remining incentives programs have been very successful. Coal mine operators using these programs have reclaimed over 6,900 abandoned mine land (AML) acres equivalent to an estimated \$44.9 million in reclamation value. Current reclamation costs for grading and revegetation of abandoned mine sites averages about \$9,500 per acre.

The Government-Financed Reclamation Construction Contracts (GFCC) program benefits the public and the mining operators by establishing contracts for mining companies to conduct operations that will reclaim AML sites at little or no cost to the public. Between Jan. 1991 and Dec. 31, 2014, there were 262 contracts issued, with an estimated total reclamation value of approximately \$19.4 million.

The Remining Operator Assistance Program (ROAP) created an incentive to remine and reclaim AML areas by providing financial assistance for most of the cost of permitting the remining area. Between Aug. 1996 and Dec. 31, 2014, there were 30 mine operators participating in this program on 60 remining sites. The total cost to the commonwealth of these 60 remining ROAP projects was \$913,284. Through Dec. 31, 2014, there were 45 projects with approved remining permits at a cost to the commonwealth of \$800,971. Of these 45 ROAP permits, two became bond forfeitures and two projects had their ROAP funds reimbursed to DEP by the mine operator because of reimbursement liability regulations. The remaining 41 permits will eventually reclaim 1,843.4 acres of AML with an approximate reclamation value of \$17.5 million.

Under the Financial Guarantees program, DEP provides low cost bonding of remining areas. As of Dec. 31, 2014, 202 coal mine operators used financial guarantees to bond 725 mining permit increments. Those operations have reclaimed 3,634.8 acres of AML, saving the commonwealth an estimated \$22.2 million.

The Bond Credits program also provides an incentive for operators to reclaim an AML area by earning a "bond credit" under a Consent Order and Agreement with DEP. Five licensed mine operators have completed six bond credit projects. The six projects that have been completed under this program reclaimed 50.1 acres and represent a reclamation value of \$553,239. A Consent Order and Agreement for a seventh project was signed on Aug. 21, 2013. The project plans to reclaim 50.6 acres and reconstruct over 3,600 feet of stream channel. Reclamation started in calendar year 2014 and is expected to be completed August 2015.

Because of implementation feasibility, DEP has not promulgated regulations nor established final criteria for the Designating Areas Suitable for Remining program, as explained in detail on page 4 Individual Program Descriptions.

1996-2013

Program	Year	Number of Companies	Number of Projects	AML Acres Reclaimed as of 12/31/2013	Reclamation Value of Projects Completed by 12/31/2013
Government-Financed Rec. Contracts	91-13	98	253	2,701.8	\$16,976,950
ROAP	97-13	30	41	156.5	\$1,017,750
Financial Guarantees	96-13	181	704	3,550.6	\$21,435,790
Bond Credits	96-13	6	7	50.1	\$553,239
Totals		315	1,005	6,459	\$39,983,729

Summary of Reclamation and Remining Incentives Programs
2014

Program	Year	Number of Companies	Number of New Projects	AML Acres Reclaimed During 2014	Reclamation Value of Projects Completed in 2014
Government-Financed Rec. Contracts	2014	1	9	254.4	\$2,416,800
ROAP	2014	Program Ceased	Program Ceased	176.7	\$1,678,650
Financial Guarantees	2014	21	21	84.2	\$799,900
Bond Credits	2014	0	0	0	0
Totals		22	30	515.3	\$4,895,350

II. Conclusions and Recommendations

DEP has developed four of the five reclamation and re-mining incentive programs authorized by the 1992 amendment to SMCRA. They are: Government Financed Reclamation and Construction Contracts, Re-mining Operator's Assistance Program, Re-mining Financial Guarantees to Ensure Reclamation, and Reclamation Bond Credits. The fifth program - Designating Areas Suitable for Re-mining has not been implemented. Mine operators utilizing these four programs have reclaimed over 6,900 acres of AML. This equates to an approximate reclamation value of \$44.9 million (completed reclamation areas only). There are projects in progress with re-mining or reclamation yet to be completed.

These programs are encouraging AML reclamation at a dramatic cost saving to the commonwealth. The environment is being enhanced, the mine operators are receiving support, and the AML burden is being reduced. Re-mining by industry is a major component of this reclamation effort. This program encourages reclamation with financial incentives for operators to re-mine and reclaim AML as opposed to surface mining on virgin lands. DEP will continue to identify and develop incentives to encourage and expand reclamation and re-mining operations.

III. Background

This report has been prepared in accordance with the requirements of Section 4.11(b) and (c) of SMCRA. Section 4.11(b) requires DEP to prepare a report regarding DEP's reclamation and re-mining programs to the Senate and House Environmental Resources and Energy Committees. Section 4.11(b) was added to the SMCRA by passage of Act 173 on Dec. 18, 1992. This report summarizes the status of DEP's reclamation and re-mining programs authorized under the SMCRA Sections 4.8, 4.9, 4.10, 4.12, 4.13, and 18.

There are five primary reclamation and re-mining programs authorized by these sections of the SMCRA:

- Section 4.8 – Government Financed Reclamation and Construction Contracts
- Section 4.9 – Designating Areas Suitable for Reclamation by Re-mining
- Section 4.10 – Re-mining Operator's Assistance Program (ROAP)
- Section 4.12 – Re-mining Financial Guarantees to Ensure Reclamation
- Section 4.13 – Reclamation Bond Credits

Section 18 of the SMCRA includes the creation of the Re-mining Environmental Enhancement Fund and the Re-mining Financial Assurance Fund. The status of both of these funds is included in Sections V and VI, of this report, respectively.

In addition to the program descriptions contained in this report, appropriate tables for each program showing site/operator lists, project cost, reclamation dollar value and pertinent dates are included in the appendices to this report. Many of the re-mining incentive program descriptions refer to a "re-mined

area.” A “remined area,” as defined in these descriptions, includes the AML area to be reclaimed and up to 300 feet of adjacent previously unmined area that is needed to complete the reclamation. This report was submitted to the Mining and Reclamation Advisory Board (MRAB) as required by Section 4.11(c)(5) of SMCRA. The MRAB’s comments are included as Appendix A.

IV. Individual Program Descriptions

A. SMCRA Section 4.8 - Government-Financed Reclamation and Construction Contracts

The GFCC program involves contracted operations that will reclaim AML sites at little or no cost to the public. This program was previously known as the No-Cost Government-Financed Reclamation Contracts Program. Regulations were deemed unnecessary for implementation of this program.

This program allows removal of incidental coal or coal refuse during the reclamation of an AML site. Occasionally, coal removal is necessary in order to effectively and efficiently reclaim an AML site. The value of the coal or coal refuse that must be removed to reclaim the site offsets the cost of the reclamation project.

Under the GFCC program, the mining industry has made progress in reclaiming coal refuse and other AML sites at no additional direct cost to the commonwealth. Between Jan. 1991 and Dec. 31, 2014, there were 262 contracts issued reclaiming 2,956.2 acres for a total reclamation value of approximately \$19.4 million. The projects contracted during 2014 are listed in Appendix B.

Government-Financed Reclamation & Construction Contracts Overview:

	As of 12/31/13	As of 12/31/14
Number of acres completed	2,701.8	2,956.2
Number of companies	98	1
Number of projects	253	262

B. SMCRA Section 4.9 - Designating Areas Suitable for Reclamation by Remining

DEP has not promulgated regulations nor established a program for designating areas suitable for remining. DEP found that pre-permit information gathering may cost between \$25,000 and \$200,000. This is a substantial amount to spend for a project that may not move ahead. DEP does not have either the money or the staffing necessary to perform this type of work.

C. SMCRA Section 4.10 - Remining Operator’s Assistance Program (ROAP)

The regulations for the ROAP program were promulgated as 25 Pa. Code Sections 86.261-86.270 and became effective on Aug. 24, 1996. The ROAP program provided an incentive to an operator to remine and reclaim an AML area that the operator would not otherwise reclaim. This incentive was in the form of DEP financial assistance towards the cost of obtaining a permit for the remining area. The ROAP program paid qualified consultants to collect and analyze permit-specific hydrogeological data and prepare reports used in the mine permit application.

Between Aug. 1997 and April 2003, 30 operators applied to this program for 60 remining ROAP projects. As of Dec. 31, 2014, 41 ROAP projects became mining permits. When completed, these 41 operations will have provided 1,843.4 acres of surface AML reclamation and almost 1,000 acres of AML underground reclamation. The cost to DEP in ROAP assistance for these 41 permits was \$800,971. DEP or the applicant cancelled 19 of the 60 projects. DEP's cost for these 19 projects totaled \$145,763. Of the 41 ROAP applications that became mining permits, 10 of these permits are actively mining, while six are in various stages of reclamation and 25 have fully completed reclamation activities. No additional applications have been taken into the program since 2003 because funding for the program has ceased.

The complete ROAP program projects are listed in Appendix C.

Remining Operator's Assistance Program (ROAP) Overview:

ROAP AML acres reclaimed between Jan. 1, 2014 and Dec. 31, 2014 are 176.7 AML surface acres at a cost of \$63,028.

Total ROAP AML acres reclaimed as of Dec. 31, 2014 are 333.2 AML surface acres at a cost of \$399,658.

Total ROAP AML acres reclaimed upon completion of all ROAP Projects are estimated at 1,843 at a cost of \$800,971, with an estimated total reclamation value over \$17.5 million.

D. SMCRA Section 4.12 – Remining Financial Guarantees to Ensure Reclamation

The Remining Financial Guarantees to Ensure Reclamation Program regulations were promulgated as 25 Pa. Code Sections 86.281-86.284 and became effective on Aug. 24, 1996. Under this program, DEP provides low-cost bonds to guarantee reclamation of the remining area of a surface mine permit.

Each operator and each permit must meet the regulatory criteria to participate in this program. An operator is limited to a maximum financial guarantee value of 30 percent of the amount allocated in the Financial Guarantee Special Account within the Remining Financial Assurance Fund (RFAF). Each permit is limited to a maximum financial guarantee value of 10 percent of the amount allocated in the Financial Guarantee Special Account within the RFAF. During 2006, with the support of the MRAB, DEP increased the amount allocated from \$800,000 to \$1,000,000. This allowed DEP to raise the maximum amount of remining financial guarantees that an operator may use at any one time from \$240,000 to \$300,000 and the maximum permit limit from \$80,000 to \$100,000. During 2010 (again with the approval of the MRAB) DEP used part of the fees paid by operators to increase the amount of funding allocated to the Remining Financial Guarantee Program to \$1,200,000. This allowed DEP to again raise the maximum amount of remining financial guarantees that an operator may use at any one time to a maximum permit limit of \$120,000 and a maximum operator limit of \$360,000. This amount may be adjusted periodically by DEP based on premium payments made by the operators as well as bond forfeitures. .

Act 157 of Oct. 24, 2012 authorized the transfer of up to \$500,000 to the RFAF for use in supporting remining financial guarantees issued by DEP. The additional \$500,000 was transferred to the RFAF in March 2013. By allocating an additional \$500,000 the maximum limits for the Remining Financial Guarantee Program increased to \$510,000 per operator and \$170,000 per permit.

An operator is not required to pay the per acre reclamation fee on any area bonded with financial guarantees. Bond release is the same as for any other bond; however, financial guarantees are the first bond released on a surface mining permit.

The operator pays an annual fee for financial guarantees of one percent per year. The fee is paid in advance and is not refundable. The one percent fee goes into the RFAF. This is the only source of income to the fund.

As of Dec. 31, 2014, a total of 202 coal mine operators had used financial guarantees 725 times. Those operators have reclaimed 3,634.8 acres of AML. This has saved the commonwealth an estimated \$22.2 million in reclamation costs. Seven operators have permits that are at the \$170,000 per permit limit and one operator is close to their \$510,000 per operator limit.

Appendix D lists the individual projects that were issued in 2014.

Remining Financial Guarantees to Ensure Reclamation Program Overview:

	As of 12/31/13	As of 12/31/14
Reclamation value of abandoned mine projects	\$21,435,290	\$22,235,190
Number of acres of AML completed	3,550.6	3,634.8
Number of operators participating	181	202
Number of financial guarantees issued	704	725

E. SMCRA Section 4.13 - Reclamation Bond Credits Program

The Bond Credits program regulations were promulgated as 25 Pa. Code, Sections 86.291-86.295, and took effect on Aug. 24, 1996.

The Bond Credits program provides an incentive to an operator to voluntarily reclaim an abandoned mine area that the industry would not ordinarily reclaim. An operator may earn a “bond credit” under a Consent Order and Agreement with DEP by reclaiming an AML area. The area does not have to be associated with a mining permit. The value of the bond credit is equal to the lesser of either DEP’s cost or the operator’s cost to reclaim the stipulated area. Once earned, the operator may use the bond credit instead of normal bonding on future mining permits. The reclamation values for the bond credit reclamation projects are based on DEP’s calculated costs for reclamation of the sites.

Each bond credit may be used twice by the operator in lieu of a normal bond on a mining permit. The bond credit may be transferred to another operator.

Five licensed mine operators have completed six bond credit projects. The earned “bond credits” are being used. Approximately \$57,000 has been released from its second use and is available for use on new projects. The special account established to financially assure bonding obligations under this program was increased from \$500,000 to \$1,100,000 in July 2014. This increase was supported by funds held in the Remining Financial Assurance Fund.

A Consent Order and Agreement for a seventh project for the amount of \$562,305, was signed on Aug. 21, 2013. The project will reclaim 50.6 acres of AML and reconstruct 3,648 feet of stream channel. Reclamation started in calendar year 2014 and is expected to be completed August 2015.

Reclamation Bond Credits Overview:

	As of 12/31/13	As of 12/31/14
Reclamation value for completed projects	\$553,239	\$553,239
Number of acres reclaimed	50.1	50.1
Number of projects completed	6	6
Number of projects in process	1	1

V. Remining Environmental Enhancement Fund (REEF)

Section 18 of SMCRA, as amended by Act 173 of 1992, authorizes the secretary of DEP to transfer a maximum of \$1 million per year into the REEF. This transfer shall be aggregated from revenue sources in the Surface Mining Conservation and Reclamation Fund, the Clean Water Fund, the Coal Refuse Disposal Control Fund, and the Bituminous Mine Subsidence and Land Conservation Fund. REEF is used to fund the ROAP program and the Designating Areas Suitable for Remining program.

The ROAP program received appropriations of \$850,000 from REEF: \$450,000 from the Surface Mining Conservation and Reclamation Fund, \$125,000 from the Coal Refuse Disposal Control Fund, \$125,000 from the Bituminous Mine Subsidence and Land Conservation Fund, and \$150,000 from the Clean Water Fund. The ROAP program spent about \$806,155 over five years. This fund is now depleted. The money remaining in the Surface Mining Conservation Fund, the Coal Refuse Disposal Control Fund, and the Bituminous Mine Subsidence and Land Conservation Fund is obligated to complete reclamation of forfeited sites

VI. Remining Financial Assurance Fund (RFAF)

The Pennsylvania Legislature also authorized the establishment of the RFAF in the 1992 amendments to SMCRA. This fund is used to provide the reserve for the Remining Financial Guarantees to Ensure Reclamation and Reclamation Bond Credit Programs. These amendments authorized DEP to transfer up to \$5 million from the Land and Water Development Fund to the RFAF. In 1996 \$1 million was transferred into the RFAF. A second \$1 million was transferred into the RFAF in 1997. Act 157 of Oct. 24, 2012 authorized the transfer of up to \$500,000 to the RFAF for use in supporting remining financial guarantees issued by the department.

There are no planned expenditures from the RFAF. The money in this fund is used as a reserve to guarantee the bonds written in the Reclamation Bond Credit and Financial Guarantee programs. The bond credit program is required to have funds in the RFAF at least equal to funds issued as bond credits. The Financial Guarantee program is authorized to use an actuarial formula (mine permit forfeiture rate + a safety factor) to leverage the amount of money in the reserve to write more financial guarantees than are actually allocated in the fund, based on the historical rate of bond forfeitures. Currently, \$1.7 million is allocated for financial guarantees, allowing DEP to write \$22.6 million in financial guarantees. As of Dec. 31, 2014, \$10,943,276 was designated to financially assure reclamation obligations on mining permits with approved remaining areas.

The only other source of funding for the Financial Guarantee and Bond Credit Programs stems from the one percent annual fee that the permittees pay for the use of the financial guarantees. Since the Financial Guarantee program became available in Jan. 1997, participating coal mine operators have paid \$2,061,089 in annual fees. The annual fees must be held in reserve until the fund for Financial Guarantees is considered actuarially sound. The fund is actuarially sound when there is a sufficient amount of money in reserve to cover any expected losses.

DEP has allocated \$1.7 million to the Financial Guarantee Special Account to act as the reserve for the Financial Guarantee Program. DEP had allocated \$500,000 to the Bond Credit Account to act as the reserve for the Bond Credit Program. In July 2014, DEP allocated an additional \$600,000 within the RFAF to the Bond Credit Account bringing the total amount in the account to \$1,100,000.
