

Report Instructions for the *Oil and Gas Compliance Report*

1. Overview of Reports

The Oil and Gas Compliance Report is designed to show all inspections that were performed by the Oil and Gas Inspector for the Oil and Gas well locations in the Commonwealth of Pennsylvania. Any inspection that meets the Search Function Section parameters will be shown on the report.

2. Search Function

DATE
INSPECTED
FROM
(MM/DD/YYYY)

DATE
INSPECTED TO
(MM/DD/YYYY)

Used for selecting the time period in which the inspection occurred. The report will include all inspections that have been issued on the Start Date, on the End Date and every date in between. These dates are required when executing this report and must be in mm/dd/yyyy format

COUNTY

Used for selecting All Counties or one (1) County to be included on the report

MUNICIPALITY

Used for selecting All Municipalities or one (1) Municipality for above selected County to be included on the report

REGION

Used for selecting a particular DEP Region in which the facility being inspected is located.

OPERATOR

Used for selecting All Operators or one (1) Operator by name for which inspections were performed.

UNCONVENTIONAL ONLY

Used to select whether the report will include only Unconventional well inspections (YES) or all inspections including Unconventional well inspections (NO).

INSPECTIONS WITH VIOLATIONS ONLY

Used to select that only Inspection that had violations will be included on the report (Yes) or all inspections will be included (No)

RESOLVED VIOLATIONS ONLY

Used to select violations that have been resolved (YES) or all violations (NO).

INSPECTION CATEGORY

Used for limiting the inspections by category (Client, Site, or Primary Facility)

3. Report Controls

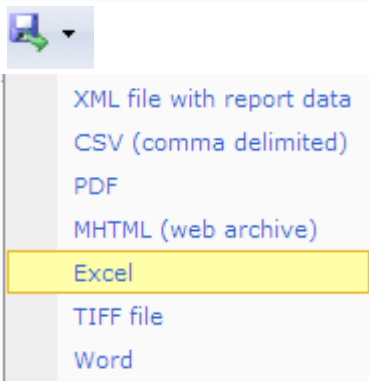

Used for paging from report page to report page.

Used to set the size of the report displayed.

Used to search the report for specific information.

Used to select the file type of the report download.

Used to refresh the report based on the earlier selected parameters.

Used to print the current report to your local selected printer.

4. Report Acronyms

Acronym or Term	Definition
Operator	The person designated as the well operator or operator on the permit application or well registration. Where a permit or registration was not issued, the term shall mean any person who locates, drills, operates, alters or plugs any well or reconditions any well with the purpose of production there from.
Well	<p>A bore hole drilled or being drilled for the purpose of or to be used for producing, extracting or injecting any gas, petroleum or other liquid related to oil or gas production or storage, including brine disposal, but excluding bore holes drilled to produce potable water to be used as such.</p> <p>The term "well" does not include a bore hole drilled or being drilled for the purpose of or to be used for systems of monitoring, producing or extracting gas from solid waste disposal facilities, as long as the wells are subject to the act of July 7, 1980 (P.L. 380, No. 97), known as the Solid Waste Management Act, and do not penetrate a workable coal seam. The term also does not include a borehole drilled or being drilled for the purpose of or to be used for degasifying coal seams if the following conditions are satisfied:</p> <p>(1) (A) the bore hole is used to vent methane to the outside atmosphere from an operating coal mine; and (B) the bore hole is regulated as part of the mining permit pursuant to the act of June 22, 1937 (P.L. 1987, No. 394), known as The Clean Streams Law, and the act of May 31, 1945 (P.L. 1198, No. 418), known as the Surface Mining Conservation and Reclamation Act; and (C) the bore hole is drilled by the operator of the operating coal mine for the purpose of increased safety; or</p> <p>(2) the bore hole is used to vent methane to the outside atmosphere pursuant to a State or Federal funded abandoned mine reclamation project.</p>
Oil	Hydrocarbons in liquid form at standard temperature of 60 degrees Fahrenheit and pressure 14.7 PSIA.
Gas	Any fluid, either combustible or noncombustible, which is produced in a natural state from the earth and which maintains a gaseous or rarified state at standard temperature of 60 degrees Fahrenheit and pressure 14.7 PSIA, any manufactured gas, any byproduct gas or any mixture of gases.

Drilling	The drilling or re-drilling of any well or the deepening of any existing well.
Unconventional Well	An unconventional gas well is a well that is drilled into an unconventional formation, which is defined as a geologic shale formation below the base of the Elk Sandstone or its geologic equivalent where natural gas generally cannot be produced except by horizontal or vertical well bores stimulated by hydraulic fracturing.
