OVERVIEW OF THREATENED AND ENDANGERED SPECIES: WYOMING COUNTY

Transco has consulted with the U.S. Fish and Wildlife Service (USFWS), Pennsylvania Fish & Boat Commission (PFBC), Pennsylvania Game Commission (PGC), and Pennsylvania Department of Conservation and Natural Resources (DCNR) regarding federal and state-listed threatened and endangered species in the Project area. A summary of the correspondence/clearance status with each agency is provided below, and copies of the referenced letters are provided in **Attachments G-2** through **G-5**.

USFWS

Transco prepared a biological assessment (BA) addressing the following federally listed threatened and endangered species identified by the USFWS as potentially occurring in the Project area: Indiana bat (IBAT), northern long-eared bat (NLEB), bog turtle, and northeastern bulrush. Surveys for the IBAT and NLEB were requested and completed in Wyoming County. The BA was developed in close coordination with the USFWS Pennsylvania Field Office. The BA concluded that the Project may affect, but is not likely to adversely affect each of these species. Based on these effects determinations, formal Section 7 consultation will not be necessary for the Project. FERC concurred with Transco's effects determinations and submitted their consultation request to FERC on July 19, 2016. The USFWS advised Transco that they plan to issue a technical assistance letter to FERC in October 2016, outlining their findings and recommendations related to Section 7 compliance. Transco will forward the USFWS technical assistance letter to PADEP upon receipt.

PFBC

PFBC requested, and Transco completed, surveys for timber rattlesnake in Clinton, Northumberland, Schuylkill, and Lebanon Counties. No surveys for threatened or endangered species under the jurisdiction of PFBC were requested for Wyoming County. PFBC issued Project clearance letters on January 28, 2016, May 31, 2016, and September 2, 2016. The most recent clearance letter issued on September 2, 2016 covers two reroutes that were not included in PFBC's original review of the Project.

PGC

PGC requested, and Transco completed, surveys for Allegheny woodrat and eastern small-footed bat in Schuylkill, Northumberland, Columbia, and Wyoming Counties. PGC issued Project clearance letters on June 2, 2016 and September 19, 2016. The most recent clearance letter issued on September 19, 2016 covers two reroutes that were not included in PGC's original review of the Project.

A combined mitigation plan for Allegheny woodrat and eastern small-footed bat (ESFB) was submitted to and approved by the PGC, as documented in the above-referenced Project clearance letters.

Table G-1 below outlines the habitat impact and mitigation summary for the ESFB in Wyoming County.

**TABLE G-1
EASTERN SMALL-FOOTED BAT HABITAT IMPACT AND MITIGATION
SUMMARY**

IMPACT LOCATION (APPROXIMATE)	TIME OF YEAR RESTRICTION	HABITAT RECONSTRUCTION REQUIRED? (Y/N)
MOC#0071-MP 1.5 to 1.6	April 1 – November 15	N
MOC#0071-MP 2.9	April 1 – November 15	N

For ESFB habitat located within the Project's LOD, Transco will complete construction outside of the indicated time of year (TOY) restriction, or exclusion matting will be installed outside of the TOY. If exclusion matting is installed, the habitat can be impacted during the TOY restriction as outlined in the mitigation plan. If exclusion matting is not installed and impacts are proposed within the TOY restriction, emergence count surveys will be completed the day prior to habitat disturbance or exclusion matting installation.

No Allegheny woodrat were observed and no impacts to their habitat are proposed in Wyoming County; therefore, Transco is not required to implement any mitigation or time of year restrictions for Allegheny woodrat in Wyoming County.

DCNR

Transco completed surveys for state-listed plant species in Wyoming County. No state-listed plants are present within the Project LOD in Wyoming County. DCNR has issued several clearance letters for the Project following submittal of survey reports by Transco. Project clearance letters were issued by DCNR on April 02, 2015, May 28, 2015, August 05, 2015, February 23, 2016, May 24, 2016, and August 31, 2016. The most recent clearance letter issued on August 31, 2016 covers two reroutes that were not included in DCNR's previous review of the Project. Based on the survey results and complete survey coverage, no mitigation or further consultation with the DCNR is needed for CPLN in Wyoming County.
