Texas Eastern Transmission, LP  
c/o Mr. William Brett, Supervisor – Environmental Construction Permitting  
890 Winter Street, Suite 300  
Waltham, MA 02451

Re: Water Obstruction and Encroachment Permit (WOEP) Issuance  
Conemaugh River Crossing Project  
DEP Permit No. E6583220-026  
APS ID No. 1017926; AUTH ID No. 1317195  
Derry Township, Westmoreland County  
Blacklick Township, Indiana County

Dear Mr. Brett:

Enclosed is your copy of your State Water Obstruction and Encroachment Permit (WOEP). Please review this permit so that you are aware of the extent of authorization and the applicable conditions.

Please be advised that you do not have Federal authorizations for this project and such authorization is required prior to starting your project. In accordance with procedures established with the U.S. Army Corps of Engineers, you will be contacted directly by the Corps regarding Federal Authorization.

In addition to the above-referenced permit authorization, the permittee has additional responsibilities:

1. **This WOEP is not effective until a copy of the Acknowledgment of Appraisal of Permit Conditions, signed by you, is received by the Department. Any work conducted prior to the Department's receipt of the signed Acknowledgment of Appraisal of Permit Conditions is a violation of the Dam Safety and Encroachments Act and the Clean Streams Law, and you may be subject to fines and penalties.** The Department will provide you with an acknowledgement letter upon receipt of your fully signed Acknowledgment of Appraisal of Permit Conditions.
2. A copy of the Permit, Acknowledgment of Appraisal of Permit Conditions, the Erosion and Sediment Control plan, this Issuance Letter, and any other applicable State and Federal authorizations, must be maintained on site during construction and available at the work site for inspection upon request by any officer or agent of the Department or any other Federal, State, County or Municipal agency.

3. A Completion Report must be submitted to this office within 30 days of completion of the approved project. The Completion Report form must be signed by you and the supervising engineer indicating that the work has been completed as approved.

Any person aggrieved by this action may file a petition for review pursuant to Section 19(d) of the Natural Gas Act, 15 U.S.C. § 717r(d), with the Office of the Clerk, United States Court of Appeals for the Third Circuit, 21400 U.S. Courthouse, 601 Market Street, Philadelphia, PA 19106-1790 within the time prescribed in the law. Important legal rights are at stake, so you should show this document to a lawyer at once.

If you have additional questions, please contact Nick Rossi at 717.772.5667 or nicrossi@pa.gov.

Sincerely,

Domenic Rocco, P.E.  
Director  
Regional Permit Coordination Office

**COMMONWEALTH OF PENNSYLVANIA  
DEPARTMENT OF ENVIRONMENTAL PROTECTION  
REGIONAL PERMIT COORDINATION OFFICE**

**WATER OBSTRUCTION AND ENCROACHMENT PERMIT**

The Department of Environmental Protection "Department", established by the Act of December 3, 1970, P.L. 834 (71 P.S. §§510.1 et seq.) and empowered to exercise certain powers and perform certain duties under and by virtue of the Act of November 26, 1978, P.L. 1375, as amended by the Act of October 23, 1979, P.L. 204 (32 P.S. §§693.1 et seq.) known as the "Dam Safety and Encroachments Act"; Act of October 4, 1978, P.L. 851, (32 P.S. §§679.101 et seq.) known as the "Flood Plain Management Act"; Act of June 22, 1937, P.L. 1987, (35 P.S. §§691.1 et seq.), known as "The Clean Streams Law"; and the Administrative Code, Act of April 9, 1929, P.L. 177, as amended, which empowers the Department to exercise certain powers and perform certain duties by law vested in and imposed upon the Water Supply Commission of Pennsylvania and the Water and Power Resources Board, hereby issues this permit to:

**Texas Eastern Transmission, LP  
890 Winter Street, Suite 300  
Waltham, MA 02451**

giving its consent to:

**construct, operate and maintain water obstructions and encroachments associated with the Conemaugh River Crossing Project, consisting of installation of approximately 2,670 feet of 24-inch diameter replacement Line 12 pipeline and appurtenant facilities and abandonment via grouting of approximately 1,275 feet of existing Line 12 24-inch pipeline. Approximately 1,860 feet of the pipeline will be installed via Horizontal Directional Drilling (HDD) under the Conemaugh River. The proposed project impacts include 195 linear feet of permanent impacts to the Conemaugh River (WWF); 0.002 acres of permanent floodway impacts; 0.15 acres of permanent impacts to Palustrine Emergent (PEM), Palustrine Scrub-Shrub (PSS), and Palustrine Forested (PFO) wetlands and; 1.83 acres of temporary impacts to PEM and PSS wetlands.**

**The permittee is required to compensate for the proposed project impacts by providing 0.23 acres of wetland mitigation. The permittee will purchase 0.23 acres of off-site mitigation bank credits from the approved compensatory mitigation provider.**

**The project begins on the western side of the Conemaugh River in Westmoreland County at an existing valve site (Latitude: 40.455036°; Longitude: -79.301894°), and ends on the eastern side of the Conemaugh River in Indiana County northeast of another existing valve site (Latitude: 40.458303°; Longitude: -79.294683°).**

If this work authorized by this permit is not completed on or before **December 31, 2025**, this permit, if not previously revoked or specifically extended by the Department in writing, shall become void without further notification.

This permit is issued in response to an application filed with the Department of Environmental Protection on **June 11, 2020**, and with the understanding that the work shall be performed in accordance with the maps, plans, profiles and specifications filed with and made a part of the application on **July 27, 2020, November 25, 2020 and January 22, 2021**, subject to the provisions of the Dam Safety and Encroachments Act, the Flood Plain Management Act, the Clean Streams Law, the Administrative Code, the rules and regulations promulgated thereunder and the following conditions and restrictions:

1. The permittee shall sign the Acknowledgement of Appraisal of Permit Conditions thereby expressly certifying the permittee's acceptance of, and agreement to comply with, the terms and conditions of this permit. The permittee shall return a signed copy of the Acknowledgement of Appraisal of Permit Conditions to the Department. Unless the Acknowledgement of Appraisal of Permit Conditions form is completed and filed with the Department, this permit is void.
2. **Work may not commence until a signed copy of the Acknowledgement of Appraisal of Permit Conditions is received by the Department.** Any work authorized by this permit conducted prior to the Department's receipt of a signed copy of the Acknowledgement of Appraisal of Permit Conditions is a violation of the Dam Safety and Encroachments Act and the Clean Streams Law, and you may be subject to fines and penalties pursuant to those Acts.
3. The Department, in issuing this permit, has relied on the information and data which the permittee has provided in connection with this permit application. If, subsequent to the issuance of this permit, such information and data prove to be false, incomplete or inaccurate, this permit may be modified, suspended, or revoked, in whole or in part, and the Department may, in addition, institute appropriate legal proceedings.
4. This permit does not give any property rights, either in real estate or material, nor any exclusive privileges, nor shall it be construed to grant or confer any right, title, easement, or interest in, to, or over any land belonging to the Commonwealth of Pennsylvania; neither does it authorize any injury to private property or invasion of private rights, nor any infringement of Federal, State, or Local laws or regulations; nor does it obviate the necessity of obtaining Federal assent when necessary.
5. The work shall at all times be subject to supervision and inspection by representatives of the Department, and no changes in the maps, plans, profiles, and specifications as approved shall be made except with the written consent of the Department. The Department, however, reserves the right to require such changes or modifications in the maps, plans, profiles, and specifications as may be considered necessary. The Department further reserves the right to suspend or revoke this permit if in its opinion the best interest of the Commonwealth will be subserved thereby.

6. This permit authorizes the construction, operation, maintenance and normal repair of the permitted structures conducted within the original specifications for the water obstruction or encroachment, and in accordance with the regulations of the Department and terms and conditions of this permit. Any repairs or maintenance involving modifications of the water obstruction or encroachment from its original specifications, and any repairs or reconstruction involving a substantial portion of the structure as defined by regulations of the Department shall require the prior written approval and permit of the Department.
7. All construction debris, excavated material, brush, rocks, and refuse incidental to this work shall be removed entirely from the stream channel and placed either on shore above the influence of flood waters, or at such dumping ground as may be approved by the Department.
8. There shall be no unreasonable interference with the free discharge of the river or stream or navigation during construction.
9. If future operations by the Commonwealth of Pennsylvania require modification of the structure or work, or if, in the opinion of the Department, the structure or work shall cause unreasonable obstruction to the free passage of floodwaters or navigation, the permittee shall, upon due notice remove or alter the structures, work or obstructions caused thereby, without expense to the Commonwealth of Pennsylvania, so as to increase the flood carrying capacity of the channel or render navigation reasonably free, easy, and unobstructed, in such manner as the Department may require. No claim shall be made against the Commonwealth of Pennsylvania on account of any such removal or alteration.
10. The permittee shall notify the Department, in writing, of the proposed time for commencement of work at least 15 days prior to the commencement of construction.
11. If construction work has not been completed within the time specified in this permit and the time limit specified in this permit has not been extended in writing by the Department or if this permit has been revoked for any reason, the permittee shall, at his own expense and in a manner that the Department may prescribe, remove all or any portion of the work as the Department requires and restore the watercourse and floodplain to their former condition.
12. The permittee shall fully inform the engineer or contractor, responsible for the supervision and conduct of the work, of the terms, conditions, restrictions and covenants of this permit. Prior to the commencement of construction, the permittee shall file with the Department in writing, on a form provided by the Department, a statement signed by the permittee and an individual responsible for the supervision or conduct of the work acknowledging and accepting the general and special conditions contained in this permit. Unless the acknowledgment and acceptance have been filed, this permit is void. A copy of this permit and the acknowledgment shall be available at the work site for inspection upon request by an officer or agent of the Department or another Federal, State, County or Municipal Agency.

13. The permittee shall operate and maintain the structure or work authorized herein in a safe condition in accordance with the permit terms and conditions and the approved maps, plans, profiles and specifications.
14. This permit may not be transferred without prior written approval from the Department, such approval being considered upon receipt of the properly executed "Application for Transfer of Permit" form.
15. If and when the permittee desires to discontinue use or abandon the activity authorized herein, the permittee must remove all or part of the structure or work authorized and take other actions as are necessary to protect safety and the environment in accordance with a permit issued by the Department.
16. If the use of explosives in any waterways is required, the permittee shall secure the prior written permit from the Pennsylvania Fish and Boat Commission, pursuant to the Pennsylvania Fish and Boat Code, Act 1980-175 Title 30 Pennsylvania Consolidated Statutes, Section 2906. Requests should be directed to the Pennsylvania Fish and Boat Commission, Division of Environmental Services, 595 East Rolling Ridge Drive, Bellefonte, PA 16823-9685, telephone 814.359.5250.
17. Permittee shall implement and monitor an Erosion and Sedimentation Control Plan prepared in accordance with Chapter 102 so as to minimize erosion and prevent excessive sedimentation into the receiving watercourse or body of water.
18. The project site shall at all times be available for inspection by authorized officers and employees of the Pennsylvania Fish and Boat Commission. Prior to commencement and upon completion of the work authorized by this permit, the permittee shall notify the Pennsylvania Fish and Boat Commission's Southwest Regional Office, 236 Lake Road, Somerset, PA 15501; Telephone: (814) 445-8974
19. The project site shall at all times be available for inspection by authorized officers and employees of the County Conservation District. Prior to commencement and upon completion of the work authorized by this permit, the permittee shall notify the, Westmoreland or Indiana Conservation District (as applicable):

Westmoreland County Conservation District  
218 Donohoe Road  
Greensburg, PA 15601  
Telephone: (724) 837-5271

Indiana County Conservation District  
280 Indian Springs Rd., Suite 124  
Indiana, PA 15701  
Telephone: (724) 471-4751

20. **SPECIAL CONDITIONS:** The permittee shall be responsible for compliance with each of the following special conditions. Please direct any notifications, requests for approval, or post-issuance documents to the Regional Permit Coordination Office at telephone 717.722.5987, email [RA-EPREGIONALPERMIT@pa.gov](mailto:RA-EPREGIONALPERMIT@pa.gov).

**Water Supplies:**

- A. If the project results in a pollution event or other adverse impact to any public or private water supplies, the permittee shall immediately notify the Department and the potentially affected public or private water supplies of the pollution event.
- B. In the event that the permittee's work related to this authorization causes adverse impacts to a public or private water supply source, the permittee shall address the restoration or replacement of the impacted water supply and mitigate and/or remediate any pollution resulting from the project in accordance with applicable legal requirements.
- C. At least 72 hours in advance of beginning construction activities, the permittee shall notify all water users with downstream surface water intakes within one mile downstream, including but not limited to, drinking water users, industrial, and commercial users that may be impacted by turbidity or water quality changes.
- D. If a public or private drinking water source not previously identified by the permittee is discovered by the permittee during construction, the permittee shall immediately notify the Department of the identified water source and shall notify that source of the permittee's construction activities.
- E. At least 72 hours in advance of beginning any construction activities, the permittee shall notify all identified public and private water supplies along the project's corridor that may be affected by increased turbidity or other water quality changes caused by the permittee's construction activities.

**Historic, Cultural, or Archaeological Resources:**

- F. The permittee and its agents shall visually inspect for historic, cultural, and archaeological resources that may be encountered during construction of the project and shall immediately cease earth disturbance activities in the vicinity of the archaeological artifacts upon encountering such potential artifacts.
- G. If potential historic, cultural, or archaeological resources are discovered, the permittee shall immediately notify the Pennsylvania Historical and Museum Commission (PHMC) at P.O. Box 1026, Harrisburg, PA 17120-1026, telephone 717.783.8947, and shall concurrently notify the Department.

**Submerged Lands License Agreements:**

- H. The permittee shall comply with all terms and conditions of the Submerged Lands License Agreement entered into between the Department and the permittee for the natural gas pipeline crossing of the Conemaugh River, which is incorporated herein by reference.

**Temporary Road Crossings:**

- I. All temporary road crossings of streams and wetlands must meet all of the following conditions:
  - a. The permittee shall restore and stabilize all temporary crossing sites immediately after termination of its permitted use.
  - b. Approach roads to temporary road crossings shall utilize original grades. However, clean rock material or gravel to a depth of six inches above original grade can be utilized for approaches, as necessary.
  - c. All wetland crossing sites shall be stabilized by appropriate means, including, but not limited to, using removable, temporary mats, pads, or other similar devices to ensure minimization of impact on the ecology of the wetland.
  - d. Temporary embankments for roads across wetlands shall be installed with piping or other conveyance measures to maintain the hydrology of the wetland.
  - e. The permittee shall remove all or any portion of a temporary road crossing upon written notification to the permittee from the Department in the event the project is causing an adverse impact on public health, safety, or the environment or in any other manner violates the requirements of the Pennsylvania Clean Streams Law, 25 Pa. Code Chapter 105, or both.

**Site Field Verification, Restoration, and Monitoring:**

- J. All wetlands within the project area shall be accurately field-delineated and appropriately flagged prior to the start of construction activities and shall remain field-delineated until earth disturbance activities are completed, and the site has been stabilized. An acceptable means of field-identification of wetlands includes, but not limited to, the use of an orange construction safety fence and/or flags.
- K. Excess fill from disturbed areas and construction activities shall be located outside of the floodway, floodplain, or other bodies of water. The permittee is responsible for stabilizing any excess materials spoiled onsite or offsite, whether the permittee owns the site or others own the site.
- L. The permittee shall restore all disturbed wetland areas to original contours and replant with indigenous wetland vegetation in accordance with the restoration plans as presented in the permit application upon completion of final earthmoving activities.
- M. Wetland disturbances shall be minimized and stabilized within four (4) calendar days of final earthmoving activities.

- N. The Department has determined that the permittee has made arrangements to satisfy their compensatory mitigation requirements for 0.23 acres of wetland credits through the purchase of 0.23 ac of wetland credits from the approved compensatory mitigation provider First Pennsylvania Resource, LLC (Department File No.: MB9915-0001) approved for use in Compensation Service Area 18. Within sixty (60) days from the date of issuance of this permit, the permittee shall provide to the Department proof of transfer of the approved credit amounts and types and First Pennsylvania Resource, LLC's acceptance of liability to provide the compensatory mitigation requirements. Failure to provide such proof of transfer of credits and First Pennsylvania Resource, LLC's acceptance of liability of compensatory mitigation requirements shall violate the terms and conditions of this permit. This failure may result in the modification, suspension or revocation of this permit, in whole or in part, and/or the Department may, in addition, institute appropriate legal proceedings.

**Horizontal Directional Drilling (HDD):**

- O. This Permit does not authorize the removal of woody vegetation for the purposes of operation and maintenance of the pipeline in wetland and riparian areas that are proposed to be crossed using trenchless methodology.
- P. The permittee shall construct and operate the HDD crossings at wetlands, streams, and floodways in a manner to prevent a release of drilling fluid to "waters of the Commonwealth." The permittee shall immediately notify the Department in the event of an Inadvertent Return and immediately activate and implement the Preparedness Prevention Control Plans (PPC Plans) including the HDD Contingency Plan, to prevent any impacts to waters of the Commonwealth and other natural resources.
- Q. The permittee shall take measures to avoid drilling activities in the vicinity of mine voids and utilities.
- R. The permittee shall visually monitor the ground surface and waters of the Commonwealth that are located within the vicinity of the HDD while drilling operations are occurring. This monitoring shall include walking, wading, and use of a boat, as necessary, to effectively observe and monitor for the return of materials associated with HDD activities to the surface or to Waters of the Commonwealth. If loss of circulation of drilling fluid occurs or drilling fluid pressure is lost, the permittee shall immediately investigate the drilling pathway and surrounding area for an inadvertent return. If an inadvertent return is discovered, drilling shall immediately cease.
- S. If an inadvertent return occurs within regulated waters of the Commonwealth, the HDD shall only resume after:
- a. A Registered Professional Geologist or Registered Professional Engineer inspects and evaluates the site for the likelihood of another inadvertent return; and
  - b. The permittee consults with and receives written approval from the Department.

- T. For those HDD sites that experience an inadvertent return and do not have an approved contingency crossing method, the permittee shall submit a permit modification to the Department for review and approval prior to commencing an alternate crossing method.
- U. Inadvertent returns that impact or discharge to streams, floodways, or wetlands during the HDD operations shall be remediated in compliance with the Preparedness Prevention Control Plans (PPC Plans) including the HDD Contingency Plan. If clean-up operations differ from the submitted plans, prior approval from the Department will be necessary.
- V. HDD additives which are certified for conformance with ANSI/NSF Standard 60 (Drinking Water Treatment Chemicals - Health Effects) are deemed acceptable to the Department, when used in the manner indicated in the certification of the additive. All conditions included as part of the additive's certification should be followed. A current listing of certified drilling fluids is maintained by NSF at <http://www.nsf.org/Certified/PwsChemicals/Listings.asp?ProductFunction=Drilling+Fluid&>. Use of drilling additives certified for conformance with ANSI/NSF Standard 60 does not relieve operators from the requirement to obtain the necessary permits to conduct HDD operations. Use of certified additives does not relieve the operator of liability should an inadvertent return or other pollution of the waters of the Commonwealth occur as a result of drilling operations.
- W. To prevent impacts to water quality from drilling/boring operations, the permittee shall have 1) an environmental inspector on site for the duration of the crossing operation, and 2) a vac truck be available within three (3) hours to respond to inadvertent returns/releases. In the event of an inadvertent return or release of sediment into a body of water, PFBC Bureau of Law Enforcement Regional Office must be notified within 24 hours.

**Habitat Conservation Plans and Threatened and Endangered Species Protection:**

- X. Prior to conducting any future maintenance activities on the pipeline or right of way which involves disturbance, the permittee shall conduct a current Pennsylvania Natural Diversity Inventory search, shall obtain clearance(s) for any species or resource where a potential impact is identified, provide the avoidance and mitigation plan to the Department prior to initiating such maintenance work and shall implement, and adhere to all avoidance measures outlined in such clearance(s).

**Miscellaneous:**

- Y. Pollution of any waterway with harmful chemicals, fuels, oils, greases, bituminous material, acid, or other harmful or polluting materials, is prohibited.
- Z. Herbicide spraying of wetlands is not authorized by this Permit. Additionally, with the exception of a 10-foot wide area centered over the pipeline, maintenance mowing of wetlands is not authorized by this Permit. The permittee shall place and maintain signs or other demarcation around the boundary of each wetland to clearly delineate the areas where this maintenance is not authorized. The permittee shall place the signs or other demarcations when all restoration work is completed and prior to permit termination.

- AA. This Permit does not convey any real property rights or interests or authorization to trespass on privately-owned riparian land. By accepting this Permit, the permittee certifies that he/she holds title, easement, right, or other real interest in the riparian land. Any dispute over property ownership and/or right of legal access is solely a matter for private litigation.
- BB. All temporary water withdrawal intake structures and all appurtenant works shall be removed from the watercourse, body of water, floodway, and floodplains as prescribed within the permit application. Deviations from the approved permit application shall require prior written approval from the Department.
- CC. Water pumped from any construction area shall be directed through a sediment trap, basin, or a filter bag discharging into an appropriate vegetated filter area to prevent a discharge of sediment into any waters of the Commonwealth.
- DD. This Permit authorizes only those impacts to waters of the Commonwealth that were specifically described in the permit application(s) and revisions. Any additional impacts to waters of the Commonwealth from water obstruction or encroachment activities including, but not limited to, temporary access roads, lay-down areas, staging areas, or temporary work spaces, that have not been specifically identified in the permit application are not authorized. Any proposed changes regarding the specific impacts will require a permit amendment.
- EE. No deviation in the construction methodology or project design shown on the approved drawings is authorized unless approved through an amendment of this Permit by the Department in writing. If the specific resource crossing has pre-approved primary, secondary, or tertiary methods, the permittee shall send a written notification to the Department and the respective county conservation district prior to the change.
- FF. This Permit does not relieve the permittee of the obligation of complying with all Federal, interstate compact, State laws, regulations and standards, and local ordinances applicable to the construction, operation or maintenance of the water obstruction or encroachment.
- GG. The permittee shall follow the measures specified in the Preparedness, Prevention, and Contingency Plan during construction. The permittee shall maintain a copy of the Preparedness, Prevention, and Contingency Plan on-site at all times during construction, train all staff to use and implement this plan, and have this plan available to provide at the request of any Department inspector.
