Dear Nicholas Bryan:

The Department of Environmental Protection (DEP) received a Notice of Termination (NOT) form dated March 4, 2022 for a portion of the above-referenced project as required by 25 Pa. Code § 102.7. A final site inspection of that portion, described as areas with black limit of disturbance (LOD) with shading and call outs as shown on the Permit Renewal ES/SR drawing set dated March 2022 and corresponding tracking table, was conducted on October 28, 2021 by Washington County Conservation District, October 23, 2021 by Allegheny County Conservation District, October 14, 2021 and November 4, 2021 by Westmoreland County Conservation District, December 10, 2021 by Indiana County Conservation District and December 7, 2021 and December 9, 2021 by Cambria County Conservation District and a copy of the Earth Disturbance Inspection Report forms are attached to this letter. The site inspections found that the earth disturbance activities authorized by the permit have been concluded on that portion; the site has been stabilized in accordance with the requirements of 25 Pa. Code § 102.22(a)(2) (related to permanent stabilization); post-construction stormwater management (PCSM) best management practices (BMPs) have been installed or the site restoration or reclamation is complete; and temporary erosion and sediment control (E&S) BMPs have been removed.

Since the portion of the project site described in the NOT has met all regulatory requirements, DEP approves the NOT for this portion of the project site, and your permit coverage has been amended to apply to the remainder of the project site. Please note that the responsible person(s) identified in Appendix C of the NOT is now responsible for the long-term operation and maintenance of the PCSM BMPs installed within the described portion of the approved permit.

The permittee and any co-permittees remain responsible for compliance related to the remainder of the project site, not identified in the NOT, with the permit terms and conditions, including the long-term operation and maintenance of all PCSM BMPs installed as part of the approved ESCGP permit, and for any violations occurring on the project site in accordance with 25 Pa. Code § 102.7(c).

If you have questions about your permit, please contact me at 412-442-4149 or dadrake@pa.gov and refer to Permit No. ESG0500015001.

Sincerely,

Dana Drake
