Re: Technical Deficiency Letter
ESCGP-3 Permit Application
Pennsylvania Pipeline Project (PPP)/Mariner East 2
Major Modification – PA Turnpike/HDD 0280
Southeast Regional Office Submission
Construction Spread 6
DEP File No. ESG0100015001
Upper Uwchlan Township
Chester County

Dear Mr. Gordon:

The Department of Environmental Protection (DEP) and the Chester County Conservation District (District) have reviewed the above-referenced application and has identified the technical deficiencies listed below. The *Pennsylvania Erosion and Sediment Pollution Control Program Manual* (E&S Manual) and the *Pennsylvania Stormwater Best Management Practices Manual* (BMP Manual) include information that may aid you in responding to some of the deficiencies listed below. The deficiencies are based on applicable laws and regulations, and the guidance sets forth DEP's established means of satisfying the applicable regulatory and statutory requirements.

Technical Deficiencies

1. Please utilize a minimum of 24" Filter Sock adjacent to streams and wetlands. [102.4(C)]
2. A substantial amount of pipe is now proposed to be installed within Meadow Creek Lane. The road should be evaluated for crowning, location of inlets and E&S controls should be adjusted accordingly if needed based on the expected trenching method such as stockpiling material along the work area or placing trench material in dump trucks and hauling off to another location. [102.11(a)(1)]

3. There is a gap in the 12" filter sock upslope of the existing dwelling below station 14776+00. Please close the gap in E&S controls and check over entire plan for similar issues. [102.11(a)(1)]
4. Please provide E&S controls from station 14778+00 to 14780+00. [102.11(a)(1)]
5. Please provide a blow up of the stream/wetland crossing on the plan mapping and illustrate the proposed E&S controls for bypassing the stream flow both on the regular mapping and within the blow up insert. [102.11(a)(1)]
6. Please demonstrate in your response letter, the Post Construction Stormwater Management (PCSM) Narrative, and the PCSM Plan Drawings how the permittee and/or co-permittee will address all of the components of Title 25 Pa. Code § 102.8(n) in the restoration or reclamation activities of the proposed earth disturbance activities for the areas of the Major Modification.

You must submit a response fully addressing each of the technical deficiencies set forth above. Please note that this information must be received within 30 calendar days from the date of this letter, or DEP may deny the ESCGP-3 Permit application.

Please submit a response letter addressing the above comments and two copies of the revised information (one set should include **highlights** of all revisions) to the District at 688 Unionville Road # 200, Kennett Square, PA 19348, and two copies of the revised information (one set should include **highlights** of all revisions) to DEP at the address located in the first page footer.

Please coordinate with the District prior to resubmitting. The District may require a District application and/or additional fees associated with your resubmission.

If you believe that any of the stated deficiencies are not significant, instead of submitting a response to that deficiency, you have the option of requesting that DEP make a permit decision based on the information you have already provided regarding the subject matter of that deficiency. If you choose this option with regard to any deficiency, you should explain and justify how your current submission satisfies that deficiency.

Mr. Matthew Gordon
