I agree with Debby on the Checklist. With regard to the impervious surface data Pittsburgh District is not in the area of concern for this data tracking so no need to send us anything.

Subject: RE: PPP and the PASPGP-5 Checklist

Hi Brad,

The purpose of most of the checklist is for PADEP to determine if a project is reporting to the Corps. If PADEP does not need it filled out, then the Baltimore District is fine with that, with one exception. Could you please provide the information below, which is solicited in the form?

Thanks,
Debby

IMPERVIOUS SURFACE DATA FOR CORPS

YES NO 1a. Is your project located in the Corps of Engineers Philadelphia District (Delaware River Watershed), or in Chester, Lancaster, or York County?

YES NO 1b. Does your project propose impervious surfaces within waters and wetlands? If YES, provide area of impervious surface within the footprint of waters and wetlands: square feet _____

YES NO 1c. Does any part of your project propose the removal of any impervious surfaces? If YES, provide area of impervious surface being removed: square feet _____

Subject: [EXTERNAL] PPP and the PASPGP-5 Checklist

Hi All,

PADEP has indicated to us that they do not need the new form filled out for their application purposes. They requested that we check with the USACE. So if you could let us know in the meeting on Tuesday whether you need this filled out or not that would be great.

Have a great weekend!

Brad

Here you go Dave. I left the YES or NO that answers the question.

IMPERVIOUS SURFACE DATA FOR CORPS

YES it is located in Chester, Lancaster and York counties. 1a. Is your project located in the Corps of Engineers Philadelphia District (Delaware River Watershed), or in Chester, Lancaster, or York County?

NO 1b. Does your project propose impervious surfaces within waters and wetlands? If YES, provide area of impervious surface within the footprint of waters and wetlands: square feet _____

Hi Dave, I hope you are doing well and enjoyed the weekend.

I have not received your decision on this. Can you respond so we can satisfy the DEPs request.

Thank you,

Brad
