The Lehigh Crossing was approved 11/19/18, however, the approval letter appears to have been misfiled. I can confirm it was approved by the notes on the plan itself. Please let this email serve as notice of said approval. If there is an outside agency that requires a copy of the actual letter let me know and I will have a new one forwarded.

I had not received this letter for the Susquehanna River crossing ATON plan. Thanks very much for forwarding. I will review it with the team, and we will get back to you with revised plans.

Did you have any comments on the Lehigh/Walter crossing? If there was a separate letter related to that ATON plan, please forward it. I did not receive a comment letter.

Thank you,

Sarah Binckley

Ms. Binckley,

Review was complete in Nov. 2018. Unfortunately, I had to issue a denial letter as there were aspects of the plan that needed to be corrected. I have not received a revised copy since. Attached is the letter with specifics.

Captain Burrell,

I am following up to check on the status of two Aid to Navigation Plans that we submitted on behalf of PennEast Pipeline Company at the end of October 2018. These plans were for the Susquehanna River crossing and the Lehigh River (Francis E. Walter Reservoir) crossing.

The Baltimore District USACE reviewer asked me about the status of the Susquehanna ATON last week. I let him know when it had been submitted and stated that the plan is presumably under review. If you would, please provide an update on the status of PFBC's review. Please also let us know if you have any questions or need any additional information.

Thank you!

Attn: S. Binckley

I have reviewed the recently submitted revised ATON Plan for the PennEast Pipeline Project crossing the Susquehanna River in Wyoming Borough and Jenkins Township, Luzerne County. The Plan is acceptable as submitted and has been approved. All signage / buoys must be installed prior to construction and inspected frequently to ensure they are always visible to boaters. Any changes to this plan must be submitted directly to this office for further review. If buoys are to be utilized PFBC-277 Application to Install Floating Structures/Private Aids to Navigation must be submitted and approved prior to installation.

I will share the approved ATON plan with the PA Fish & Boat Commission Division of Environmental Services and the Regional Law Enforcement Office to ensure they are aware of the project. Please advise the contractor that the project site may be inspected at any time by Bureau of Law Enforcement personnel for compliance with this plan. A copy of the approved plan along with this letter should be available for inspection if requested.

Please feel free to contact me if you have any questions concerning this project or the PA Fish & Boat Commission Aids to Navigation program in general.

Sincerely,

Thomas J Burrell, LtCol.
Bureau of Law Enforcement
