Re: Chapter 102 (Erosion Control) and Chapter 105 (Dam Safety and Waterway Management)
permit applications for Williams' Regional Energy Access Expansion Project

Secretary Ziadeh:

Please accept the attached comment on behalf of Pipeliners Local 798 in support of Williams' Regional Energy Access Expansion Project during its comment period for Chapter 102 and Chapter 105 permit applications.

Our members, who are among the nation's most highly skilled and trained industry workers, collected 1,048 signatures on our comment in the American Pipeline Action Network because they recognize the urgent need for reliable, affordable natural gas in the region, as well as the high level of care project developers have taken to ensure environmental safety.

Local 798 craftsmen undergo extensive training and education to ensure the pipeline infrastructure we work on meets the highest standards of quality. We respect that Williams consistently demonstrates this commitment, in addition to engaging with stakeholders and community leaders during the planning process and making appropriate modifications to develop the most responsible project route.

On behalf of the local workforce, residents and all Americans who share a growing need for reliable, cost-effective and domestically sourced energy, I ask that you consider the voices on the following pages when discussing critical permits for the REA Expansion Project.

Sincerely,

Danny Hendrix
Business Manager
Pipeliners Local 798

Harrisburg, PA 17101

Re: Chapter 102 (Erosion Control) and Chapter 105 (Dam Safety and Waterway Management)
permit applications for Williams' Regional Energy Access Expansion Project

Secretary Ziadeh:

We write to express support of the permit applications by Williams to construct the Regional Energy Access Expansion Project in Pennsylvania. We encourage the Pennsylvania Department of Environmental Protection to issue the pending Chapter 102 (Erosion Control) and Chapter 105 (Dam Safety and Waterway Management) permits so the construction of this much needed project can begin.

The Regional Energy Access Expansion Project will provide abundant, cost-effective firm gas supply to markets in the region, providing the necessary and critical infrastructure needed to meet future clean energy demand. This includes complimenting the intermittency of currently available renewable alternatives and being adaptable to support future developments involving renewables, including Renewable Natural Gas blending and green hydrogen.

Current demand projections show that the region will reach a supply deficit of natural gas in the near future. This project will help meet the growing demand for energy, as well as increasing reliability and lowering energy costs for millions of Pennsylvania homes and businesses.

Furthermore, the Regional Energy Access Expansion Project is designed to have minimal environmental impacts. The project will maximize the use of existing Williams' infrastructure and rights of way, minimizing disturbance and environmental impacts, including the impacts on aquifers, groundwater, stormwater runoff, spring thaws and streams. Additionally, Williams is committed to minimizing impacts on landowners and have reduced overall limits of disturbance along the projects route, which will not impact any state forest areas or state parks, nor impact any 'old growth' trees in pipeline areas.

The Regional Energy Access Expansion Project is a significant private investment in the region, providing an opportunity to put thousands of Pennsylvanians to work. The construction of the project will generate approximately \$1.6 billion in additional wages, revenues, and investments to the regional and state economy of Pennsylvania, according to a study authored by researchers at Rutgers University. Researchers at Rutgers also forecast that the project will

directly employ approximately 2,300 people in 10 Pennsylvania counties during the construction phase.

We simply cannot afford to deny the region the needed clean energy supply and the jobs and economic opportunities this project promises, since these opportunities come at minimal cost to the environment.

Signed,
