

Precertification Soils Course Dates

April 12-13, 2023 – Shippensburg University

May 17-18, 2023 – Bloomsburg University

August 9-10, 2023 – Location TBD

This required course will provide instruction on basic principles of soil science and evaluating and describing soil profiles in the field to determine suitability for wastewater effluent renovation. The course includes online learning modules as well as hands-on field training with soil scientists. Describing soil properties and identifying limitations to wastewater effluent renovation are critical skills all Sewage Enforcement Officers (SEO) need to have to properly site onsite absorption areas. The target audience for this course is SEO Candidates.

The total cost for this course is \$550.
