General Advisory Board business

Two items were discussed.

- The draft meeting minutes from July 14, 2022 TAC Board meeting were presented for discussion. No edits were noted. Greg Herb (PAR) made a motion to approve the July 14, 2022 minutes. Mary Gaiski (PMHA) seconded the motion. The motion passed by a unanimous vote.
- Potential meeting dates for 2023 were selected.
 - Primary: February 9, April 13, July 13 and October 12
 - Backup: February 17, April 18, July 27 and October 26

DEP will confirm the availability of the meeting room for these dates. The final dates will be published in the *Pennsylvania Bulletin* in December.

PFAS Schedule Change Request

DEP presented information on the PFAS schedule change request form for UCMR 5. DEP discussed lab accreditation, approved labs and clarification of the methods for which each lab is approved. The TAC Board had the following comments.

- DEP should provide updates when new labs are added to lab accreditation either by creating a link/website within DEP website and update as needed or automatic email updates when new labs are added. The list should also specify the method for which each lab is accredited.
- DEP should clarify which method meets both DEP accreditation requirements and UCMR 5 approval.
- DEP should clarify whether 2023 data will be accepted retroactively if the PA rule is not final until later in 2023. DEP noted that currently there is no data grandfathering provision in the regulation, but any sampling conducted on/after the publication date may be accepted.

Business Plan Requirements & Instructions for New Community Water Systems

DEP presented information on the business plan requirements for new community water systems and the electronic version of the form. The TAC Board had the following comments.

- DEP should clarify when a water system sells would they need to update the business plan. DEP noted that an update business plan would not be required unless there is a special permit condition. Permit transfers are encouraged as a way to sustain longevity of the system.
- DEP should clarify whether the business plan requirements apply to satellite systems that are getting created with a new PWSID (are they required to submit a business plan?). DEP noted that the business plan doesn't apply to noncommunity water systems and is required for new community systems.

Lead Service Line Inventories

DEP presented information on (and a demonstration of) the service line inventory (SLI) form. The TAC Board had the following comments.

- DEP should clarify whether systems can upload a CSV file without using the DEP form. DEP noted that systems can upload a CSV file as long as all the required fields are included.
- DEP should clarify how to perform multiple entries verse single line entry.
- DEP should clarify where the form is more stringent then EPA. DEP noted that no DEP is not more stringent.
- DEP should clarify the process that will take place if systems fail to complete the inventory. DEP noted the regulation requires an annual notice to homeowners and unidentified service lines would be considered as lead service lines requiring replacement until clarification is determined. DEP encourages systems to maximize the chance of getting funding by completing the inventory early.

Spill Policy Follow-up – Presentation of Industry Ammonia Data

Matt Walborn (WBWA) presented information on data gathered by Western Berks Water Authority. The TAC Board requested clarification from Clean Water staff on when technical guidance will be released. DEP noted that there was no confirmed date at this time.

Public Comments

There were no public comments.

Adjourn

Chip Bigler (WVOAP) made a motion to adjourn. The motion passed by a unanimous vote, and the meeting adjourned at 11:20 AM.
