Thanks, Mike. We will incorporate the requirements of the rule into our Mitigation Plan which is in Module S4 of the Environmental Assessment.

Is the Corps agreeable to our approach with removing the existing culvert crossings and not counting those towards compensatory mitigation? In other words, if there is an existing culvert that is 50 feet long and PGE replaces it with a 75 foot long French Mattress, PGE would only be responsible for 25 linear feet of compensatory mitigation?

Pete, Just quickly looking over what was submitted. The Corps requires that the "Corps mitigation rule" must be followed when mitigation to stream and wetlands are required. I have included some attachments that outline what is required in the report. As part of this submittal, we ask that mitigation banks be looked at first, to determine if available credits are available for purchase. Please prepare a Mitigation Report that incorporates the requirements of the rule. Thanks!

Hi Mike,

We submitted a response to technical deficiency comments received from PADEP for this application. You can download the response at the link below. Also, attached is a revised Corps impact spreadsheet.

 [E4129225-017 PGE Saulda Response to Technical Def.pdf](#)

Please let us know if you have any questions.

Thank you,

Pete

Hi Mike,

Sorry to hear about the government shutdown. Hope all is okay on your end. Below is a link to the permit application for the Penn General Energy project in Lycoming County that we discussed in early September. Attached is the Corps impact spreadsheet.

 [334-659 JPA PADEP 20251003_reduced.pdf](#)

If you have any questions or if you need anything else, just let me know. Chris and Dan, you should have received this application via the Department's Public Upload with Payment system. It is reporting on account of greater than 250 linear feet of permanent stream impact.

Have a nice weekend,

Pete
