Recommendations for Disposal Facility Designation

Based upon the review and evaluation of the proposals, it was determined all of the facilities meet the established selection criteria. Some of the facilities are operating with permits that will expire before 2024. A few have capacity that could be greatly depleted during the term of the contract, but have room for expansion and design modifications. In these instances, actions to modify or renew existing permits are expected to result in approvals. One of the facilities currently has an active permit, but during the planning and procurement process it was not yet constructed and in operation. This same facility is restricted to accepting only construction and demolition waste.

All qualify to become designated disposal facilities in the Schuylkill County Municipal Solid Waste Management Plan. The facility with pending construction otherwise satisfies the requirements, and will be considered a designated facility contingent on receipt of PADEP's approval for it to physically receive waste.

In summary, the Schuylkill County Board of Commissioners will execute and enter into disposal capacity agreements with the facilities shown here. The table is arranged in alphabetical order by the owner/operator with each corresponding facility listed below.
