NOTICE OF INTENT TO ISSUE

Title V Operating Permit Permit No. TV 35-00014

Under 25 Pa. Code §127.521, the Department of Environmental Protection (DEP) intends to issue a renewal Title V Operating Permit to KEYSTONE SANI LDFL INC, KEYSTONE SANI LDFL INC./DUNMORE, located in Dunmore Borough, Lackawanna County. KEYSTONE SANI LDFL INC, KEYSTONE SANI LDFL INC./DUNMORE contact person regarding this application is Dominick DeNaples, Site Manager, 249 Dunham Dr., Dunmore, PA 18512-2686.

KEYSTONE SANI LDFL INC, KEYSTONE SANI LDFL INC./DUNMORE PLANT is an active municipal solid waste (MSW) landfill which operates a landfill gas (LFG) gas collection and control system (GCCS). The facility is a major stationary source subject to the Title V Operating Permit requirements adopted in 25 Pa. Code 127, Subchapter G. The proposed renewal Title V operating permit will incorporate all applicable air quality requirements for each significant source at the facility.

The Pennsylvania Environmental Quality Board promulgated the final RACT II regulation on November 12, 2022. This rule expands on the Reasonably Available Control Technology (RACT) regulations, including the establishment of numerical emission limits and presumptive RACT/RACT II requirements. It is codified under 25 Pa. Code 129.96 through 129.100. RACT is defined as the "lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility."

Pursuant to 25 Pa. Code §129.96, RACT III requirements only apply to facilities that meet either the definition of a "major NOx emitting facility" or a "major VOC emitting facility". Although Keystone is not a major VOC emitting facility; Keystone is a major NOx emitting facility as those terms are defined in 25 Pa. Code §121.1, and is therefore subject to the RACT III requirements.

Keystone completed the Department's RACT III template summarizing the applicable RACT requirements, for each of the sources listed in the current TVOP. The Landfill will meet the RACT III requirements by complying with presumptive RACT limitations. The facility complies by operating its flares and gas collection and control system (GCCS) in accordance with manufacturer's specifications and good operating practices (25 Pa. Code §129.112 (c)(8)), as well as by complying with applicable federal and state municipal solid waste (MSW) landfill air quality regulations, namely NESHAP Subpart AAAA. The emergency engines/gensets at the Landfill

are operated and maintained in accordance with the manufacturer's specifications and with good operating practices. The Landfill will continue to meet these presumptive RACT requirements as part of the normal landfill operations.

Copies of the Title V applications, DEP's analysis and other relevant documents used in the evaluation of the application are available for public inspection during normal business hours at the Department of Environmental Protection, 2 Public Square, Wilkes-Barre, PA 18701-1915.

Any person wishing to provide DEP with additional information that they believe should be considered prior to the issuance of this permit may submit the information to the Department of Environmental Protection at the address shown above. A 30-day comment period, from the date of this publication, will exist for the submission of comments. Each written comment must contain the following:

- The name, address and telephone number of the person(s) submitting the comments.
- The reference number of the proposed permit (specifically permit #35-00014).
- Concise statements regarding the relevancy of the information or objections to the issuance of the permit.

A public hearing may be held, if DEP, in its discretion, decides that such a hearing is warranted based on the information received. All people submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or in the Pennsylvania Bulletin, or by telephone, where the DEP determines such notification by telephone is sufficient. Written comments or requests for a public hearing should be directed to Mr. Norman Frederick, Chief, Facilities Permitting Section, Department of Environmental Protection, Northeast Regional Office, 2 Public Square, Wilkes-Barre, PA 18701-1915, (570) 826-2511. For additional information, contact Mark L. Mott, Permit Reviewer, Air Quality Program at the same address and phone number.
