Dear Permittee:

The Department of Environmental Protection (DEP) has received your application for authority to construct and/or operate under the Air Quality general plan approval and general operating permit for Portable Nonmetallic Mineral Processing Plants (BAQ-GPA/GP-3).

This authorization is granted for the following equipment:

- **Two (2) 500 ton/hr McCloskey J50 Crushers (Source 105-106).**
- **Two (2) 500 ton/hr Terracon 4080T Conveyors (Source 107-108).**
- **Water Spray Dust Suppression System (Control Device C105).**

I recommend that you carefully review BAQ-GPA/GP-3 to assure that all applicable terms and conditions will be met. Additionally, please be advised that the proposed facility will be subject to all applicable Federal requirements, including, but not limited to, the following: **40 CFR Part 60 Subpart OOO – Standards of Performance for Nonmetallic Mineral Processing Plants.**

This authorization is for the construction and operation of the above equipment at the facility and is valid for a two-year construction period, as the application stated this equipment is expected to be onsite up to 24 months.

If you have any questions regarding this matter, please contact Justin Haley at 814.332.6990 or by email at juhaley@pa.gov or myself at 814.332.6328 or email at dbalog@pa.gov. Thank you.

Executive Summary

On October 31, 2025, the Department of Environmental Protection (DEP) received a General Permit (GP-3) application from R & L Development Company. The applicant proposes to operate a portable nonmetallic mineral processing plant to support site grading activities at the "Laydown C" area of the Homer City Generation LP site (new power plant construction). The Department has reviewed the application and determined that the sources meet the applicability requirements of the GP-3 for Portable Nonmetallic Mineral Processing Plants.

Site and Facility Description

The facility is a temporary construction operation located at 1750 Power Plant Road, Homer City, PA 15748 (Center Township, Indiana County). The project involves site grading and earth disturbance of approximately 375 acres. The plant is expected to remain at the construction site for up to 24 months.

Source Description

The application designates the following units as the portable nonmetallic mineral processing plant:

Source ID	Unit Type	Manufacturer	Model	Capacity (tons/hr)	Date of Manufacture
105	Crusher	McCloskey	J50	500	2025
106	Crusher	McCloskey	J50	500	2025

107	Conveyor	Terracon	4080T	500	2025
108	Conveyor	Terracon	4080T	500	2025

Control Devices:

- **C105 (Water Spray):** Controls fugitive dust emissions from Crushers 105 and 106.

Power Source: Power for the plant is provided by diesel-fired nonroad internal combustion engines. These engines are authorized under a separate General Permit (GP-11) application submitted concurrently (Permit No. GP11-32-00460A, Auth ID 1548139).

Regulatory Analysis

1. **GP-3 Applicability:** The GP-3 authorizes the operation of portable nonmetallic mineral processing plants that are temporarily located at construction sites for no longer than 24 months. The applicant has indicated the plant will be at the site for up to 24 months, satisfying the applicability criteria.

2. **Best Available Technology (BAT):** Condition 18 of the GP-3 establishes that BAT includes the installation of water spray dust suppression systems or fabric collectors. The applicant has proposed the use of **Water Sprays (C105)** on the Crushers to control fugitive dust. This satisfies the BAT requirement under 25 Pa. Code § 127.1.

3. **Federal Regulations (NSPS Subpart OOO):** The proposed crushers (105, 106) and conveyors (107, 108) have a capacity greater than 150 tons/hour (500 tons/hour proposed) and were manufactured after August 31, 1983 (2025 proposed). Therefore, these sources are subject to **40 CFR Part 60 Subpart OOO** (Standards of Performance for Nonmetallic Mineral Processing Plants). The facility must comply with the emission limits and testing requirements outlined in Conditions 21 through 25 of the GP-3.

4. **Emissions Potential:** The applicant calculated the potential particulate matter (PM) emissions based on AP-42 emission factors and 3,120 hours of operation per year.

- **Total Facility Potential to Emit (Post-control):** 1.1544 tons per year (TPY) of PM. These emissions are well below the major source thresholds.

Administrative Requirements

Municipal Notification: The applicant submitted proof of notification to Center Township and Indiana County via Certified Mail, postmarked October 30, 2025. This satisfies 25 Pa. Code § 127.641 and Condition 12 of the GP-3.

Fees: The required application fee of **\$1,000.00** was received on October 31, 2025.

Compliance Review: A signed Compliance Review Form was submitted on October 27, 2025, indicating no deviations or documented misconduct.

General Information Form (GIF): A complete GIF was submitted and signed.

Recommendation

It is recommended that General Permit Authorization GP3-32-00460A be issued to R & L Development Company to authorize the construction and operation of the portable nonmetallic mineral processing plant at the Homer City Generation LP site (Laydown C) in Center Township, Indiana County, as specified in the General Permit application and the attached authorization.
