9. Limits on Peak Particle Velocity and Airblast

Blasts shall be designed and conducted to achieve either a minimum scaled distance of 90 or meet the maximum allowable peak particle velocity indicated by Figure 1 of PA Code Chapter 211.151 (c) and not exceed the noise levels specified in Table 1 of PA Code Chapter 211.151 (d) at the closest building not owned or leased by the permittee or its customer.

The Department may establish an alternative peak particle velocity or airblast level if it determines that an alternative standard is appropriate. Request for the Department to establish an alternative peak particle velocity or airblast level must be submitted to the Department Blasting and Explosives Inspector in writing. (attachment)

NOTE: Additional review time will be necessary if the applicant requests that the Department establish an alternative peak particle or airblast limit.

Shot Day Procedures

Jobsite: Homer City Generating Station/Turbine 1

Date: 10/14/2025

Time: 6:00pm

At least 2 weeks prior, the GC is responsible for notifying local authorities (police, fire and EMT departments/services)

Shot Day Sequence of Events:

1. All parties involved in operations and exclusion zones control are present.
2. Safety coordination meeting:
 - a) Security checkpoints assigned to GC personnel (checkpoints pre-determined).
 - b) Numbered radios issued to all security checkpoints personnel.
 - c) Back up cell phone numbers provided and confirmed.

Timeline: (Times are subject to change per the GC and weather)

2hrs prior - Pre-Blast meeting [All Hands-on Deck]. Go over all personnel assigned security checkpoint locations and what to expect on radio communications.

1hr 15mins prior - All personnel go to assigned security checkpoints and perform first radio check.

30mins prior - Second radio check from all security checkpoints. "All Clear" Seismic personnel - instruments operational and personnel in safe location

15mins prior - Confirm all GC personnel and any spectators are in safe locations, cameras up and running.

5mins prior - Third radio check from all security checkpoints and 5-minute warning siren.

1min prior - 1 minute warning siren. Final radio check from all security checkpoints and exclusion zones. ("ALL CLEAR" will be relayed over the radios)

6:30am - If "ALL CLEAR", commence the 10 second count down: "10, 9, 8, 7, 6", over the radios, followed by a silent "5, 4, 3, 2, 1" (which will provide a small window of safety) followed by "Fire in the hole" [if no security breaches].

"Shot takes place."

After smoke has cleared blast area - Demtech Blasters go to blast site to perform post blast inspection [looking for any undetonated explosives] and will sound the "All Clear."

TBD - Demtech will announce the "ALL CLEAR", GC is approved to collapse exclusion zones and open roads.

NOTE: Should some unforeseen anomaly occur, Demtech takes full control of the situation! [From a safe distance]. Security checkpoints personnel stay at locations until advised otherwise. Safety Zones around the affected area will be established. The situation will be analyzed, and a plan will be formulated. With no explosives related dangers present - DEMTECH GIVES "ALL CLEAR" to the GC. All security checkpoints personnel will return to the command post.
