RE: SSIP Application 26003 for 2 ASTs – Facility ID 22-60170

Dear Cory Hoffman:

DEP has completed its technical review of your application for a Site-Specific Installation Permit (SSIP) for the installation of two (2) aboveground storage tanks at Crane Clean Energy Center, Londonderry Township, Dauphin County. Enclosed please find the approved SSIP #26-22-010. This permit should be kept on site and made available for inspection by DEP staff or DEP-certified installers or inspectors.

Before placing product in the storage tanks, Operating Permits must be obtained. It is recommended that DEP's ePermitting application be used for these operating permit applications. If unable to use ePermitting, a completed Storage Tanks Registration/Permitting Application form (2630-PM-BECB0514) should be submitted. The form must be signed by the DEP-certified installer(s) and a DEP-certified inspector. DEP will notify the applicant when the tanks are registered, and the Operating Permits are issued. Please contact Josh Blanco, 717.772.5804, jblanco@pa.gov for assistance with the ePermitting online portal.

Please note that the issuance of this Site-Specific Installation Permit (SSIP) does not constitute the issuance of other DEP permits that may be necessary for this project. Ensure that all other required permits are in place prior to commencement of the project.

If you have any questions regarding issuance of your permit, please contact us at 717.772.5599.

Sincerely,

A handwritten signature in black ink that reads "Randy D. Martin".

Randy D. Martin, Chief
Division of Storage Tanks
Bureau of Environmental Cleanup and Brownfields
