Contact Phone Number: (717) 346-7200

## NELAP - accredited by

NJ DEP - Laboratory Number: PA059
PA DEP LAP - DEP Lab ID: 22-00223

## Analytical Report For

## Environmental Cleanup

Name of Sample Collector: Dennis J Low
Date Received: 06/14/2021

## County: York

Municipality: Fairview Twp

## NEWBERRY TWP PFC

Sample Medium: Ground Water
Sample Medium Type: Water

Location: 620 Wyndamere Road, Etters, PA
Reason: Routine Sampling
Project: NOT INDICATED
Suite: PFAS2
Matrix: Water

## Stream Condition:

Sample Comment: Re-sample, total PFAs about 170, PFOA/PFOS close to 100; this sample (taken in garage) by-passes any treatment
Appearance: Clear

| Test Codes / CAS \# - Description | Reported Results | Date And Time Analyzed | Approved by | Test Method |
| :--- | :--- | :--- | :--- | :--- |

The results of the analyses provided in this laboratory report relate only to the sample(s) identified therein. Unless otherwise noted, the results presented on this laboratory report meet all requirements of the 2016 TNI standard. Sample was in acceptable condition when received by the Laboratory. Any exceptions are noted in the report.

* denotes tests that the laboratory is not accredited for

U - Indicates analysis was performed for the test but it was not detected. The sample quantitation limit is reported.
$J$ - Indicates an estimated value, reported between Reporting Limit (RL) and Minimum Detection Limit (MDL).
Dr. Pamela Higgins, Technical Director, Bureau of Laboratories

Analytical Report For
Environmental Cleanup

## ORGANICS LABORATORY QUALIFIERS

U-Indicates analysis was performed for the test but it was not detected. The sample quantitation limit is reported.
$J$ - Indicates an estimated value, reported between Reporting Limit (RL) and Minimum Detection Limit (MDL).
N - Indicates presumptive evidence of a compound.
B - This flag is used when the analyte is found in the associated blank as well as in the sample.
E - This flag identifies compounds whose concentrations exceed the calibration range of the instrument for that specific analysis.
P - This flag is used with a target analyte when there is greater than a $40 \%$ difference between the results obtained from the primary and confirmation columns for dual column analysis methods (e.g. pesticides, triazines, PCBs, etc)

Q - This flag identifies the average of multiple results from multiple analyses, or the average of the averages of dual column analysis methods.
X - Non-target analytes co-elute with compound. Identification unable to be confirmed.
