Ebensburg, PA 15931
ATTN: Mr. Chad Parosh, Geologic Specialist

Transmittal
NPDES Permit Renewal Application
NPDES Permit No. PA0223239, SMP No. 01930302
Charmin Plant Pitts Quarry
Specialty Granules LLC
Hamiltonian Township, Adams County, Pennsylvania

Dear Mr. Parosh:

On behalf of Specialty Granules LLC (SGI), this letter transmits the National Pollutant Discharge Elimination System (NPDES) permit renewal for the Pitts Quarry [NPDES Permit No. PA0223239, SMP No. 01930302]. This permit includes NPDES Outfalls 001 and 002 which correspond to the existing, permitted Pitts Pond 1 and Pitts Pond 2, respectively. This renewal application does not propose any changes to the existing outfalls, related structures, or operations currently permitted at the site.

Per Item 5 of the NPDES Individual Permit Conditions for NPDES Permit No. PA0223239, surface water monitoring has been completed at monitoring points SS5, SS9, SS10, TC1, TC7, TC8, and TC9 from the second quarter 2017 to the first quarter 2019. The results of this surface water sampling and testing are included for review as an attachment to this letter.

The documents included with this submission are:
- NPDES Permit Renewal Application (Form S600-PM-BMP0032)
- Public Notice Narrative
- Results of Surface Water Monitoring
- Check for Permit Fee of $500

April 4, 2019

Project No. 152596
We appreciate your efforts in reviewing the application and are available for any questions or comments. Please contact SGI or D'Appolonia should you have any questions.

Very truly yours,

D'APPOLONIA ENGINEERING DIVISION OF GROUND TECHNOLOGY, INC.

Michael D. Ward, P.E.
Principal Engineer

Attachments: NPDES Permit Renewal Application
Public Notice Narrative
Results of Surface Water Monitoring
Check for Permit Fee of $500

Cc: Mr. Anthony Shepeck – SGI (1 Hardcopy and 1 CD Copy)
   Mr. Kevin Moore, P.E. – SGI (1 CD Copy)
   Mr. Brent Jarrell – SGI (1 CD Copy)
APPLICATION FOR INDIVIDUAL NPDES PERMIT ASSOCIATED WITH MINING ACTIVITIES

Please answer all questions completely. Refer to the instructions that come with this form.

SECTION A. GENERAL APPLICANT INFORMATION

1. Application Type
   - New ($1000)
   - Renewal ($500)
   - Modification ($500)
   - Transfer ($500)

2. Applicant: Specialty Granules LLC

3. Associated Mining Permit No.: 01903002
   - NPDES Permit No.: PA0020039

4. Operation Name: Charnian Plant Pitts Quarry

5. License No.: 9952

6. Applicant Email: kevin.moore@specialtygranules.com

7. Permit/Project Type: (check applicable)
   - Coal
   - Noncoal
   - Mining permit (surface or underground)
   - Exploration
   - GP-105 (Bluestone)
   - Other

8. Public notice. (See instructions to determine if public notice is required.) Public notice has been submitted for publication. A draft notice is attached.

9. Public notice. (See instructions to determine if public notice is required.) Public notice has been submitted for publication. A draft notice is attached.

10. Production qualifications (Small business exemption)
    - COAL: Will coal production be at least 100,000 tons per year? Yes No
    - NONCOAL: Will production be at least $100,000 (1985 dollars) per year? Yes No

11. Total Affected Area (Acres): 3.132, include all associated haul roads. Note: This acreage may be greater than the acreage for the associated mining permit.

12. Estimated Timeframe:
    - Start (or permit issuance): 9/7/2019
    - End (or permit expiration): 9/7/2024

13. Permit Location or Physical Address:
    - 1456 Old Waynesboro Rd., Blue Ridge Summit, PA 17214

14. Map View of Area:
    - Attach a map with outline of the affected area associated with the mining activity and label all outfalls.
    - Map is included as part of mining permit documents marked as Exhibit No. 6.2 - Environmental Resource Map and Exhibit 9 - Operations Map

15. Receiving Stream/Watershed Name: UNIT on Tom's Creek
    - Is this stream subject to a TMDL? Yes No

16. Chapter 83 Receiving Water Designated Use: HQ-CWF and MF
    - NOTE: If designated use is "No" or "Ev", complete anti-degradation supplement form 850-PM-BMP-0007.

17. During mining, drainage will result in:
    - Point source discharge(s) (complete Section C: Outfall Information)
      - Surface Stream
      - Municipal or Private Storm Sewer - Provide name of Storm Sewer Operator
    - Non-Discharge
      - Groundwater - infiltration
      - Contaminant without discharge (reused)
    - Other (Including off-site discharges) - Describe and attach documentation to support a legal right to discharge.
    - Under normal conditions, water from Pitts Pond 1 and Pitts Pond 2 is collected and pumped to adjacent NPDES permit No. PA 0060959 for treatment in the Lower Mill Pond system or reuse in the processing plant.
### SEQUENCE B. EROSION AND SEDIMENTATION (E & S) PLAN

18. E & S Plan
An E & S plan must be included as part of the associated mining permit information or attached to this application. The plan must provide a brief narrative describing the use of proposed BMPs and their performance to manage E & S for the project. If E & S BMPs are implemented, do not follow the guidelines referenced in the PA Erosion and Sedimentation Pollution Control Program Manual (TGD # 563-2134-008) or the Engineering Manual for Mining Operations (TGD # 563-0300-011), provide documentation to demonstrate performance equivalent to, or better than, the BMPs in the Manuals.

Check one:
- E & S plan meeting the above criteria is contained within the information associated with the permit/project type listed in item #3 of this application.
- E & S information including a complete description of the implementation of BMPs is included with this NPDES application.

Check here if all BMPs are described as part of appropriate Modules of the mining permit (coal or removal) described in item No. 2. Complete the following if specific E & S Modules have not been submitted with an associated mining permit.

<table>
<thead>
<tr>
<th>BMP</th>
<th>BMP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sediment basins/traps with discharge outlet</td>
<td>Bio-infiltration areas</td>
</tr>
<tr>

<td>Other</td>
</tr>
<tr>
<td>Erosion control blankets/textiles</td>
<td>Other</td>
</tr>
</tbody>
</table>

20. Reclamation and BMPs
Check here if any of the above checked BMPs will be left after final reclamation.

If checked, supply details, signed documentation of permission by the landowner and justification in the reclamation plan with the mining permit application. If this information is contained in the mining permit documents, please explain:
### SECTION C. OUTFALL INFORMATION

This Section is to be completed when discrete outfalls are proposed. Attach additional pages for more than 4 points.

21. Identify each point in the tables below. Each discharge point must be shown and labeled as such on a map submitted with this application or as part of the mining permit/authorization. The labeling of discharge points must correspond with the labels used on the exhibit maps submitted in support of the mining permit/authorization. Non-discharging sedimentation traps and groundwater infiltration points are not outfalls and should not be included as outfalls, but should be listed at the end of this section.

#### Describe the location and source of each point.

<table>
<thead>
<tr>
<th>Discharge Point (e.g., MP, SP, Pit)</th>
<th>Latitude</th>
<th>Longitude</th>
<th>Receiving Stream</th>
<th>Source of Discharge (e.g., sedimentation pond, groundwater sink, etc.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>001</td>
<td>39° 45' 44.57&quot;</td>
<td>77° 27' 4.99&quot;</td>
<td>UNT to Toms Creek</td>
<td>Sedimentation Pond - Pitts Pond 1*</td>
</tr>
<tr>
<td>002</td>
<td>39° 45' 46.11&quot;</td>
<td>77° 27' 3.34&quot;</td>
<td>UNT to Toms Creek</td>
<td>Sedimentation Pond - Pitts Pond 2*</td>
</tr>
</tbody>
</table>

*To prevent discharge during precipitation events less than the equivalent of the 10-year, 24-hour event, water from Sedimentation Ponds 001 and 002 will be pumped to adjacent Permit No. 6477SMS, NPDES Permit No. 0059069. No change is proposed from the previous application.*

#### For the same points as above, describe the flow and treatment for each point.

<table>
<thead>
<tr>
<th>Discharge Point (e.g., MP, SP, Pit)</th>
<th>Average rate (mpd)</th>
<th>Design rate (mpd)</th>
<th>Frequency (monthly)</th>
<th>Treatment</th>
</tr>
</thead>
<tbody>
<tr>
<td>001</td>
<td>N/A</td>
<td>N/A</td>
<td>Only discharge to occur during precipitation events &gt; equivalent of 10-year 24-hour storm</td>
<td>1U - Sedimentation</td>
</tr>
<tr>
<td>002</td>
<td>N/A</td>
<td>N/A</td>
<td>Only discharge to occur during precipitation events &gt; equivalent of 100-year 24-hour storm</td>
<td>1U - Sedimentation</td>
</tr>
</tbody>
</table>

Design rate is the discharge flow at the Q 7-10 stream flow for post-mining discharges, the maximum hydraulic capacity for other treatment facilities or the routed storm flow for sedimentation ponds.

#### Latitude/Longitude Collection Method
- [ ] EMAP
- [ ] GPS
- [x] Printed Map
- [ ] Other

Check the horizontal reference datum (or projection datum) employed in the collection method.
- [ ] NAD27 (topo maps)
- [ ] NAD83 (Emap)
- [x] WGS84 (GEO84) (most GPS units)
For non-discharging sedimentation traps and groundwater infiltration points, provide the description and location:

<table>
<thead>
<tr>
<th>Discharge Point:</th>
<th>Latitude:</th>
<th>Longitude:</th>
<th>Source of Discharge (e.g., sedimentation pond, groundwater sump, etc.):</th>
</tr>
</thead>
</table>

22. **Evaluation of Thermal Impacts.** Describe how thermal impacts were evaluated and, if necessary, how they will be mitigated, in accordance with 25 Pa. Code Chapter 60.

As discussed herein, the existing ponds (Pitts Pond 1 and Pitts Pond 2) only discharge for more extreme storm events greater than the 10-year 24-hour event. Given that discharges will occur so infrequently and during extreme rainfall events, water discharged from the spillways will be representative of generally ambient temperatures, and will not require treatment for thermal impacts.

23. **Solid or liquid wastes not discharged.** Will there be sludge or sediment produced from the treatment described above?  
   
   - [ ] Yes  
   - [ ] No

Will there be liquid produced from the treatment described above (not discharged via the outfall)?  
   
   - [ ] Yes  
   - [ ] No

Describe the material and its ultimate disposal. Sediment will be collected in the ponds. Accumulated sediment will be cleaned out once the pond reaches its design sediment storage capacity. This material will be hauled to existing, on-site stockpiles for disposal or the material will be used as cover material for reclaiming stockpiles or mining areas that have reached final grade.
## SECTION D. EFFLUENT CHARACTERIZATION

Complete the following subsections for each discharge outfall listed in Item #21.

**Discharge Point No(s):** 091, 092

24. Common parameters/pollutants. Complete the table for each constituent. Indicate "E" if estimates, "D" if based on actual data. If needed, attach a separate sheet labeled "Item #24 Common parameters/pollutants". Please include the units of measurement. If you are providing data from one discharge for two or more substantially identical effluents, indicate which outfalls the data represents.

<table>
<thead>
<tr>
<th>Constituent</th>
<th>Daily Max</th>
<th>Daily Average</th>
<th>Source of Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>pH</td>
<td>6.0 - 9.0</td>
<td>N/A</td>
<td>E (Existing Pitts Pond NPDES Permit)</td>
</tr>
<tr>

<td>N/A</td>
<td>21 mg/l</td>
<td>E (Existing Pitts Pond NPDES Permit)</td>
</tr>
<tr>
<td>Ammonia (NH3)</td>
<td>N/A</td>
<td>3.5 mg/l</td>
<td>E (Existing Pitts Pond NPDES Permit)</td>
</tr>
<tr>
<td>Total Organic Carbon (TOC)</td>
<td>N/A</td>
<td>3.5 mg/l</td>
<td>E (Existing Pitts Pond NPDES Permit)</td>
</tr>
</tbody>
</table>

**Flow**

- N/A
- Accumulated water in the ponds will typically be pumped to the Lower Mill Ponds prior to discharging through the Pitts Pond outfalls. Discharge through these ponds will only occur for storm events greater than the equivalent of 10 year 24-hour storm event for Pond 1 and greater than the equivalent of 100 year 24-hour storm event for Pond 2.

**Temperature (High)**

- Temperature will be consistent with ambient daily air temperature at a given time

**Temperature (Low)**

1. Waiver option (40 CFR 122.21(k)(6)(i)(ii)) A waiver is requested for the following constituents that are not anticipated to be present in the discharge:

- CO2
- BOD
- NH3
- TOC

Provide a justification for this waiver request.

These constituents are not expected to be present above naturally occurring concentrations in the discharge from stormwater based on data from direct sampling of the existing stormwater management system at the Clarinian Facility. The detectable values obtained from direct sampling at Pitts Pond 1 completed as part of the last NPDES permit renewal are indicated above.

25. Dioxins. As the applicant, do you have reason to believe that at any time dioxins were made, used, stored or buried on or directly upgradient from the site designated for mining and/or support areas? [TCDD, 2,3,7,8-TP, Elben, TOC or HCP under 40 CFR 122.21(f)(6)(i)(ii)]

- Yes
- No

If yes, provide information and data characterizing the potential discharge on a separate sheet labeled "Item #25 Dioxins"

26. Organic Toxic Pollutants (EPA Table II). Provide waiver justification or data regarding organic toxic pollutants for the mine site.

- Waiver: This section is not applicable because this operation fulfills one of the following criteria:
  - For coal, this operation produces less than 100,000 tons per year.
  - For noncoal, this operation has gross sales of less than $100,000 per year ($100,000 dollars).

If a waiver is not applicable, refer to Appendix B: Table II - Organic Toxic Pollutants. List any constituents from that table that are expected to be present in the discharge.
None of these constituents are expected to be in the runoff tributary to the Pitts Ponds. There is no agricultural land within the permit boundary, which is the source of most of these pollutants. Also, other common sources of these pollutants such as asphalt plant features, railroad ties, or electric utility poles (in large quantities) are not present on site.

For all constituents listed above, provide a table of the estimated daily maximum concentration, the estimated daily average concentration, and the source of this information on a separate attachment labeled "Item #26 Organic Toxic Pollutants".
27. Other toxic pollutants. For new mining permits, for each of the following constituents, provide an estimate of the concentration that could reasonably expected to be present in the discharges (40 CFR 122.21 (g)(5)(ii)(A)) (EPA Table III).

For all coal mining general permits, provide the actual data for concentrations (40 CFR 122.21 (g)(5)(v)(B)).

For Noncoal renewals, provide data for those you expect to be present. Insert "X" for those not expected to be present (40 CFR 122.21 (g)(5)(v)(B)).

Please include units of measurement for all concentrations reported.

<table>
<thead>
<tr>
<th>Constituent</th>
<th>Concentration</th>
<th>Constituent</th>
<th>Concentration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arsenic, Total</td>
<td>&lt;0.005 mg/l</td>
<td>Barium, Total</td>
<td>&lt;0.005 mg/l</td>
</tr>
<tr>
<td>Beryllium, Total</td>
<td>&lt;0.002 mg/l</td>
<td>Cadmium, Total</td>
<td>&lt;0.001 mg/l</td>
</tr>
<tr>
<td>Cadmium, Total</td>
<td>&lt;0.001 mg/l</td>
<td>Chromium, Total</td>
<td>&lt;0.005 mg/l</td>
</tr>
<tr>

<td>&lt;0.003 mg/l</td>
<td>Phenols, Total</td>
<td>0.28 mg/l</td>
</tr>
<tr>
<td>Mercury, Total</td>
<td>&lt;0.002 mg/l</td>
<td>Selenium, Total</td>
<td>&lt;0.01 mg/l</td>
</tr>
</tbody>
</table>

28. Conventional and Nonconventional Pollutants. For each of the following constituents, check the boxes for those that you expect to be present in the discharge. (EPA Table IV)

- [ ] Bromide
- [ ] Nitrogen, Total Organic
- [ ] Sulfite
- [ ] Iron, Total
- [ ] Chlorine, Total Residual
- [ ] Oil and Grease
- [ ] Surfactants
- [ ] Magnesium, Total
- [ ] Color
- [ ] Phosphorus, Total
- [ ] Aluminum, Total
- [ ] Molybdenum, Total
- [ ] Fecal Coliform
- [ ] Radioactivity
- [ ] Barium, Total
- [ ] Manganese, Total
- [ ] Fluoride
- [ ] Sulfate
- [ ] Boron, Total
- [ ] Tin, Total
- [ ] Nitrate-Nitrite
- [ ] Sulfide
- [ ] Cobalt, Total
- [ ] Titanium, Total

For new outfalls, for each constituent checked above (those that you expect to be present) provide the estimated daily maximum concentration, daily average concentration and the source of the information on an attachment. For existing outfalls, report quantitative data for those checked.

The above-checked constituents have been detected in at least one sample of stormwater runoff at the Pitts Quarry at low concentrations (in naturally occurring ranges). No agricultural land use exists in the permit area and no municipal wastewater is present, which are sources of many of these pollutants.

29. Toxic Pollutants and Hazardous Substances (EPA Table V). Refer to Appendix D: Toxic Pollutants and Hazardous Substances. List any constituents from that table that are expected to be present in the discharge.

The Metal-based being mined in the Pitts Quarry contains a relatively small fraction of Actinolite minerals. Most Actinolite is crystalline (i.e., not fibrous) in form, but some Actinolite can produce asbestos-like fibers. In operation of the Chorlton Facility, SDI implements a Suspect Mineral Identification and Management Protocol which provides for the inspection of the rock face and rocks after each blasting event for evidence of the presence of Actinolite. If identified, suspect minerals are segregated and reburied. Ambient air monitoring conducted at the SDI facility August 26 - September 5, 2016 found asbestos fibers in concentrations that were not statistically different than national background concentrations. For these reasons, SDI does not anticipate asbestos to be present in significant concentrations in stormwater runoff from the mining area.

None of the other substances listed in EPA Table V are anticipated to be present. The source of many of these pollutants is agricultural land. There is no agricultural land within the permit boundary, as previously mentioned.

For all constituents listed above, provide data for each pollutant expected in the discharge or justification of why any are believed to be not present and the source of this information on a separate attachment labeled "Form #26 Toxic and Hazardous Pollutants."
SECTION E. CERTIFICATIONS

The information on the NPDES form must be certified as correct by one of the following, as applicable.

a) In the case of corporations, by principal executive officer of at least the level of vice president, or his duly authorized representative, if such representative is responsible for the overall operation of the facility from which the discharge described in the NPDES form originates.

b) In the case of a partnership, by a general partner.

c) In the case of a sole proprietorship, by the proprietor.

d) In the case of a municipal, state or other public facility, by either a principal executive officer, ranking elected official or other duly authorized employee.

30. Applicant Affidavit

I certify under penalty of law that this application and all related attachments were prepared by me or under my direction or supervision. Based on my own knowledge and on inquiry of the person or persons directly responsible for gathering the information, the information submitted in it, to the best of my knowledge and belief, is true, accurate and complete. I verify that the activity is eligible to participate in the NPDES permit, and that the MBPs, S&S Plans, and other plans and controls described are being or will be implemented to ensure that water quality standards and effluent limits are attained. Furthermore, I agree to accept all conditions and limitations imposed by the associated permit. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment or both for knowing violations pursuant to Section 306(c)(4) of the Clean Water Act and, 16 Pa. C.S. §40803-40804.

  B. Open, skid, covered
  C. Secured Tarp
  D. Sheds, buildings, trailers
  E. Other

**F4. History of site**

a. Within 3 years prior to this being a mine site, was this site used for any industrial activity?  
   ☐ Yes  ☐ No  

If yes, what products (such as those listed above) were used, stored and/or disposed of at this site?

b. Have leaks or spills occurred at this site in the past 3 years?  
   ☐ Yes  ☐ No  

If yes, provide details of the event.

c. An authorized individual must evaluate the site for non-authorized discharges such as leaking pipelines, drains, hoses and any other non-stormwater discharges.

<table>
<thead>
<tr>
<th>Date of evaluation</th>
<th>Person who did evaluation</th>
</tr>
</thead>
</table>
F6. Potential Pollution Locations
Identify locations that have potential for spills or leaks at this site:
☐ Excavation area
☐ Stockpile area
☐ Product storage area
☐ Haul roads
☐ Other(s) (Y/N): ____________________________

☐ Vehicle refueling, maintenance or washing area
☐ Equipment storage and maintenance area
☐ Chemical preparation area
☐ Treatment system setup

F6. Pollution Control
The operator or designated representative agrees to the following (check each):
☐ 1. Maintain regular pickup and disposal of waste materials
☐ 2. Undertake daily inspection of site for leaks and spills.
☐ 3. Ensure that chemical containers and supplies are properly and promptly stored after use.
☐ 4. Maintain equipment so that spills/leaks are avoided.
☐ 5. Undertake practices to keep control measures operational.
☐ 6. Take corrective actions to prevent and/collect leaks and spills.
☐ 7. Ensure products are stored in appropriate containers that are clearly labeled.
☐ 8. Locate material storage areas away from vehicle high-traffic areas.
☐ 9. Control garbage onsite to prevent dispersion by wind or water.

The above items are included as part of this PPC.

F7. Emergency Procedures and Training
The operator or designated representative confirms the following (check each):
☐ 1. The operator has in place a procedure for stopping, containing and cleaning up spills, leaks or other releases.
☐ 2. The operator agrees to train all on-site working personnel in the procedures listed in this PPC.
☐ 3. The operator has a procedure for notifying appropriate facility personnel, emergency response and regulatory agencies (including the District Mining Office) in the event of a spill, leak or release.

* Attach this notification list to this document. List is attached: ____________

The above items are included as part of this PPC.

F8. Inactivity
a. Will this site be seasonally inactive?  ☐ Yes  ☐ No
If yes, provide time period of inactivity: ____________________________
If yes, complete item b.

b. Please confirm the following by checking the appropriate box(es):
☐ Site will be secured and access limited to prevent dumping and vandalism during shutdown.
☐ Chemicals will be removed from the site during shutdown.
☐ Chemicals will be secured in locked structures during shutdown.

F9. Self-inspection and Plan Updates
The operator agrees to the following (check the box):
☐ 1. Undertake yearly, documented, self-inspections to ensure the PPC is up to date and all BMPs are working.
☐ 2. Retain the written self-inspection report for at least one year.
☐ 3. Update this PPC as necessary and upon renewal of the NPDES permit.

The above items are included as part of this PPC.
<table>
<thead>
<tr>
<th>Affidavit</th>
</tr>
</thead>
</table>

I certify under penalty of law that this PPC document and any attachments related to it were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gathered and evaluated the information submitted. The information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

PUBLIC NOTICE

Pursuant to the Noncoal Surface Mining Conservation and Reclamation Act and the Clean Streams Law, notice hereby is given that Specialty Granules LLC, 13424 Pennsylvania Ave, Suite 303, Hagerstown, MD 21742 has made application to the Pennsylvania Department of Environmental Protection for renewing its existing NPDES permit. The current permit, PA0223239, was originally issued on September 7, 1994 and will expire on September 7, 2019. This renewal does not contain revisions to the existing operation. The receiving stream for the permit area is an unnamed tributary to Tom's Creek, which has Chapter 93 stream designations of High Quality (HQ)-Cold Water Fishes (CWF) and Migratory Fishes (MF). The operation is located in Hamiltonian Township, Adams County, and is known as the Pitts Quarry (Surface Mine Permit No. 01830302). The permit area, containing 313.2 acres, is situated at 1456 Old Waynesboro Rd, Blue Ridge Summit, PA. The Iron Springs, PA, U.S. Geological Survey 7.5 minute topographic maps contains the area described. A copy of the application is available for public inspection at the Adams County Conservation District, 670 Old Harrisburg Rd Suite 201 Gettysburg, PA 17325. Written comments, objections, or a request for public hearing or informal conference may be submitted to the Department of Environmental Protection, Cambria District Mining Office, 286 Industrial Park Rd Eberbach Pennsylvania 15931 PA by [publisher to insert date], and must include the person's name, address, telephone number, and a brief statement as to the nature of the objection(s).
