RE: Adelphia Gateway Pipeline Project

> Act 14, 97 P.S. § 510-5 JMT No: 18-00672-006

Dear Mr. John P. McBlain:

This municipal notice, under the requirements of Act 14, 97 P.S. § 510-5, is to inform you that we are applying for coverage under the Erosion and Sediment Control General Permit (ESCGP-3) for Earth Disturbance Associated with Oil & Gas Exploration, Production, Processing or Treatment Operations or Transmission Facilities from the Pennsylvania Department of Environmental Protection (DEP):

Applicant Contact: Mark Valori, Adelphia Gateway, LLC

Project Location: Chester Creek Blowdown: Thornbury Township, PA, across Chester Creek from intersection of Creek Rd and Waterstock Ln; Mainline Valve 1: Glen Mills, PA, northwest of the intersection of W Baltimore Pike and Stoney Bank Rd; Transco Meter Station: Lower Chichester Township, PA, southwest of the intersection of Ridge Rd and Blueball Ave: Marcus Hook Compressor Station: Marcus Hook, PA, south of the intersection of Ridge Rd and National Ave

**Project Description**: The Adelphia Gateway Pipeline is an 84-mile pipeline that runs from Martins Creek to Marcus Hook. Facility upgrades will occur to thirteen (13) sites along the pipeline: Quakertown Compressor Station, East Perkiomen Blowdown, Skippack Pike Meter Station, Perkiomen Creek Blowdown, Schuylkill River Blowdown, Cromby Blowdown, French Creek Blowdown, Mainline Valve 2, Paoli Pike Blowdown, Chester Creek Blowdown, Mainline Valve 1, Transco Meter Station, and Marcus Hook Compressor Station.

There are four sites located in Delaware County. Chester Creek Blowdown is in Thornbury Township, Mainline Valve 1 is in Concord Township, and Transco Meter Station and Marcus Hook Compressor Station are in Lower Chichester Township, Chester Creek Blowdown and Mainline Valve 1 will undergo facility upgrades and will have areas of disturbance of 3,701 square feet and 4,255 square feet, respectively. These sites will be restored to existing conditions, and as such, will not require post construction management controls. Transco Meter Station will undergo facility upgrades, including proposed areas of pavement and gravel on existing vegetation. There is a post construction management (PCSM) plan to mitigate for the increase in impervious area. This plan includes subsurface StormTank storage and a rock-lined diversion channel. The total area of disturbance is approximately 38,000 square feet. Marcus Hook Compressor Station will undergo facility upgrades, including a proposed compressor building on existing gravel. There is a post construction management (PCSM) plan to mitigate for the increase in impervious area. This plan includes a detention basin and an area that will be depayed and converted to vegetation. The total area of disturbance is approximately 297,508 square feet.

Enclosed is a complete copy of the Notice of Intent (NOI) completed by the applicant for this project as well as copies of the erosion and sediment control plan and post construction stormwater management plans.

Sincerely,

JOHNSON, MIRMIRAN & THOMPSON, INC. On Behalf of Applicant

Shiny M. Mathew, P.E. Senior Associate

Dry M. Mathew

Water Resources

Enclosures [3]:

- 1. Notice of Intent (NOI)
- 2. Erosion and Sediment Control (E&SC) Plan
- 3. Post Construction Stormwater Management (PCSM) Plan
