Dear Mr. Armstrong

Before anyone authorizes the development on the abandoned Bishop Tube site in Malvern/Frazer PA., I would sincerely hope they look into the horrendous occurrence of Cancer in Johnson County, Franklin Indiana. Over 30 years ago the Bendix Corporation used the SAME chemicals used by Bishop Tube. They leached into the ground and still today are causing an overwhelming occurrence of CANCER even though there was a remediation. Why on Earth would anyone allow homes to be built on a site where it's an absolute that it will cause Cancer in your children. Are all of you willing to live there! Will O'Neill Developers reveal to homebuyers that their children will more than likely get rare Cancers like the children of Franklin IN. This should even be up for debate. <https://youtu.be/yIfpVySHAT0>

Sincerely,  
Kecia Lee
