

# Informational Meeting

## Air Quality Operating Permit Renewal Application Energy Transfer Marketing & Terminals L.P. (ETMT)

**Date:** Tuesday, November 12, 2024  
**Time:** 6:00pm—7:30pm  
**Location:** Marcus Hook Community Center  
7 W Delaware Ave  
Marcus Hook, PA 19061

### What is this meeting about?

ETMT is renewing its five-year Air Quality Title V Operating Permit (TVOP) for the Marcus Hook Terminal (MHT) located in Marcus Hook, Pennsylvania. A TVOP is a permit required under the Federal Clean Air Act and issued to all large or “major” sources. The permit term lasts for five years and includes existing emission limits, monitoring, record keeping, and reporting requirements to assure compliance with the regulations.

### What will this permit do?

The permit renewal does not increase the permitted pollutant limits for the plant. The permit renewal requires the plant to meet current and any updated regulatory standards and laws.

### How can I learn more about this permit?

Attend DEP’s in-person meeting on November 12, 2024, at the Marcus Hook Community Center. DEP will explain the permitting process and answer questions from the public. ETMT also will attend and answer questions from the public.

The Office of Environmental Justice helps ensure that all community members have equal opportunity to participate in DEP decision making processes. This project is in communities with particular environmental justice concerns as identified on our EJ viewer at [dep.pa.gov/EJViewer](http://dep.pa.gov/EJViewer). This application will be reviewed by DEP utilizing Enhanced Public Participation.

More information is available at the QR Code.
