

ETMT's Air Quality Permit Renewal Application Summary

Energy Transfer Marketing & Terminals L.P. (ETMT), a subsidiary of Energy Transfer, L.P., is seeking to renew its five-year Air Quality Title V Operating Permit (TVOP), for the Marcus Hook Terminal (MHT) located in Marcus Hook, Pennsylvania. TVOP is a permit required under the Federal Clean Air Act and issued to all large or "major" sources. The permit term lasts for five years and includes existing emission limits, monitoring, record keeping, and reporting requirements to assure compliance with the regulations.

ETMT is not proposing any changes to the operation of the facility through the renewal process. The permit renewal doesn't increase the permitted pollutant limits for the plant. The permit renewal will require the plant to meet current and any updated regulatory standards and laws.

The Pennsylvania Department of Environmental Protection (DEP) will be holding an Informational Meeting from 6 pm to 7:30 pm on November 12, 2024, at the Marcus Hook Community Center located at 7 W. Delaware Avenue in Marcus Hook, PA 19061. Representatives from ETMT and DEP will be available to explain the permitting process and answer any questions the public may have regarding the renewal application. Additionally, the submission of written comments, suggestions, or other information regarding the Title V renewal may be made in writing to Mr. James D. Rebarchak, Environmental Program Manager, Pennsylvania Department of Environmental Protection, Southeast Regional Office, 2 East Main Street, Norristown, PA 19401, or electronically at ra-epseroaqpubcom@pa.gov.

If you would like to review the application, hard copies are available at these convenient locations or online at the link below:
