

On January 29, 2026, the Pennsylvania Department of Environmental Protection (PADEP) completed residential well sampling at 3 homes located within 1,000 feet of the MIPC Chelsea Tank Farm's western property boundary. PADEP also collected one duplicate sample and two Quality Assurance/Quality Control (QA/QC) samples (Field Blank and Trip Blank). Langan Engineering and Environmental Services, LLC (Langan) on behalf of MIPC, LLC (MIPC) collected samples at the same sampling points from which PADEP collected samples. Samples collected by PADEP were analyzed by Eurofins, Lancaster Laboratories for analysis of PADEP Unleaded Gasoline Shortlist compounds via EPA Method 524.2. The sample results indicated that no compounds were detected in any of the samples collected during the sampling event.
