Gary

I need to go to Rockhill and pick up a grapple #2424 it has been rented out with another piece of equipment that we own. I will be arriving with a Ford f-350 and 21 foot black trailer and a personal pickup. I will arrive on site via Rock Hill Road. One truck will enter the site traveling at 4 mph max speed to reach the water truck to start to wet the roads and work area. Once that job has been completed the second truck will enter the site and travel at a max speed of 4 mph to the shop area in which the grapple is located. I will need to use the small loader (972) sitting next to the shop to pick up the grapple that sits across from the shop and place it on my trailer. My driver will then chain down the grapple, we will return the loader back to next to the shop so not to do any unnecessary traveling on site. Next we will use the water truck to wash off the grapple and truck of any debris that might be present. Lastly our employees will wet the roads down again before leaving the site. The total time I estimate we will be on site should be no more than 4 hours.
