September 13, 1989

Department of Environmental Resources
121 S. Highland Avenue
Pittsburgh, Pa. 15206-3988

Attn: Mr. Joseph Chanupa

Dear Mr. Chanupa:

In pursuant to good lines of communication and more importantly accurate record keeping of the contaminant levels of the Vanport Township Municipal System, I must bring to your attention the fact that the samples that are being taken and analysed by Westinghouse Corporation may be misleading and/or invalid, as they do not correctly reflect that of the entire system.

The samples are now being taken from the pilot tower which exists on the Authority property, however, as I interpret the Consent Agreement, the samples were to be taken and/or at least be representative of the entire system.

Please be advised to assure that accurate records of the levels of contaminants in the Authority must be taken either of a composite of that days wells operation or from the system itself.

I trust you will endeavor to correct this situation as it's imperative that accurate levels and records be kept for now and for future references in the on going struggle against contaminated water.

Please reply as soon as possible.

Respectfully yours

David P. Brooks
Superintendent

DPB/djl
