

1. A pad or sheepsfoot roller should be used on the embankment and compaction should be utilized until non-movement.
2. The angle between the pond bottom and skimmer arm pipe will be 45 degrees or less at the maximum pool elevation.
3. The outside embankment slope of the pond will be 3:1.
4. Skimmer is a 6" Faircloth Skimmer as shown on page 13-15.
