<p>The Department received a malfunction report from Shell Chemical Appalachia LLC on 6/30/22. The report indicated that on 6/23/22 approximately 11 minutes of Visible emissions were observed from the multipoint ground flare (MPGF) during the offloading of a butane railcar. The Department has identified the following violations from this event:</p> <p>1. PA-04-00740C, Section D, Source 204, Condition #001, states visible emissions from both the LP incinerator and MPGF shall not exceed 0% except for a total of five minutes during any consecutive two-hour period. By permitting visible emissions greater than 0% opacity from the MPGF in excess of five minutes on June 23, 2022, Shell caused violations of PA-04-00740C and 25 Pa. Code § 127.25.</p> <p>2. 40 CFR § 60.18 (b)(1), states flares shall be designed for and operated with no visible emissions as determined by the methods specified in paragraph (f), except for periods not to exceed a total of 5 minutes during any 2 consecutive hours. By permitting these visible emissions from the MPGF on June 23, 2022, Shell caused a violation of 40 CFR § 60.18.</p>
