Bureau of Waste Management
Division of Hazardous Waste Management
P.O. Box 69170
Harrisburg, PA 17106-9170

Subject: Thermostat Recycling Corporation's 2012 Annual Report

Dear Mr. Beer:

Attached is TRC's annual collection report for calendar year 2012. TRC has made its best effort to provide a comprehensive report on its efforts to promote the collection program in Pennsylvania and improve the program's environmental outcomes.

While results are encouraging, much work remains. Access to the program continues to improve and participation has increased dramatically. However, our ultimate success is still dependent on HVAC contractor participation.

TRC continues to aggressively market its program in Pennsylvania. We are working with HVAC wholesalers to increase the visibility of the program at their locations and will continue to push information about the program to HVAC contractors, technicians, homeowners, and others in the state.

TRC welcomes the opportunity to review this report with you and discuss our 2012 marketing efforts and plans for 2013. I may be reached at 571-447-4312 or by email at mark.tibbetts@thermostat-recycle.org.

Sincere Regards,

Mark Tibbetts
Executive Director

Collection Data

Exhibit 1: 2012 Pennsylvania Collections by Brand

Brandholder	Number Thermostats	Number Switches	Total lbs Mercury
Bard	19	29	0.18
Burnham Holdings	38	51	0.32
Carrier	588	1,284	7.96
Climate Master	55	180	1.12
Empire Comfort Systems	4	4	0.02
General Electric Corporation	82	230	1.43
Goodman Global	64	139	0.86
Grainger	10	10	0.06
Honeywell	7,547	9,894	61.34
Hunter Fan	2	2	0.01
Invensys	38	42	0.26
ITT Corporation	30	36	0.22
Lear Siegler	1	1	0.01
Lennox	385	671	4.16
Lux Products	52	74	0.46
Marley-Wylain Company	13	25	0.16
McQuay International	66	199	1.23
Nordyne Corporation	41	88	0.55
PSG Controls	69	168	1.04
Rheem	125	223	1.38
Sears Holdings	66	80	0.50
Taco, Inc.	1	1	0.01
Trane	454	991	6.14
Uponor, Inc.	4	4	0.02
White Rogers	965	1,236	7.66
York/Johnson Controls	462	919	5.70
NOM	279	463	2.87
Loose Switches	-	1,537	9.53
TOTAL	11,460	18,581	115.20

In 2012, TRC recovered 115.20 pounds of mercury from 11,460 intact mercury thermostats and 1,537 additional loose mercury switches from Pennsylvania collection locations for a total count of 12,493 thermostats (mercury thermostats recovered from Pennsylvania locations averaged 1.49 switches per thermostat in 2012).

TRC recovered 9,474 thermostats from HVAC wholesale distributor collection locations and 1,986 directly from HVAC contractors.

Waste Mercury-Added Thermostat Management

Bins with waste mercury-switch thermostats are received at the fulfillment/processing center in Golden Valley, Minnesota. The facility is owned and operated by Honeywell International under contract with TRC.

Bins are received at the loading dock and sent to the TRC processing area. The bin and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name (location name), city, state, zip code, date

returned, number of thermostats and mercury switches by manufacturer and any non-conforming material.

The bin is returned to the location that sent it in with a new prepaid address label within 72 hours of receipt. The thermostats are stored and staged in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The containers are returned from the storage area to the TRC processing area to have the mercury bulbs removed from the plastic housing. Universal Waste Regulations require the disposal of waste within 12 months of generation. TRC's processor requires that the disposal

occur within 6 months of generation and TRC follows the more stringent requirement. Small quantities of thermostats are removed from the container, which is then closed again, and placed at the bulb removal workstation on a tray that contains any potential mercury spillage. The bulbs are removed from the thermostats and placed into a 2 quart container at the work station. If a bulb breaks and the mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. The TRC processing area is equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to assure that any spillage is cleaned up and not left to evaporate.

The 2 quart container is emptied into a special 55 gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are drawn away and vented when the drum is opened.

The 55 gallon drum is then shipped to Bethlehem Apparatus Corporation in Hellertown, Pennsylvania for final processing of the mercury ampoules (switches). Bethlehem Apparatus meets or exceeds all local, state, federal and EPA regulations for the management of the product. Bethlehem's approvals for mercury recovery/recycling include:

- EPA - identification No. PAD002390961 (Bethlehem Apparatus Co., Inc.)
- EPA BDAT Requirement - satisfied by all recovery operations
- CERCLA (Comprehensive Environmental Response Compensation and Liability Act)
- Pennsylvania Department of Environmental Protection

The facilities' processing follows all EPA guidelines and regulations. TRC has a facility license from Hennepin County Minnesota for the operation of the TRC. Honeywell, Inc. has a Hazardous Waste Generator license from Hennepin County. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling of Hazardous Waste and Universal Waste.

Program Education and Outreach

TRC marketing and promotion efforts targeted key audiences in Pennsylvania. Our objectives are to raise awareness of key components of Pennsylvania's mercury thermostat law and to encourage the recycling of waste mercury thermostats. Below is a summary of activities and channels we utilized in support of this effort.

Development of Written Materials and Signage for Collection Points and Key Stakeholders—TRC developed and posted on its website (www.thermostat-recycle.org) a Promotional Toolkit which contains templates of a number of items for collection points to download and reproduce.

In 2012, TRC added one new item to the toolkit: a vehicle sticker (See Exhibit 2) for HVAC contractors to promote their participation in the program. TRC maintains an inventory of these stickers and provides them to contractors at no-cost. They are distributed upon request, and at industry events.

Wholesaler/HHW Engagement—Pennsylvania’s law requires manufacturers to avail collection containers to HVAC wholesale distributors, thermostat retailers, and local governments upon request.

In **May 2012**, TRC sent postcards to approximately 160 wholesale collection locations in Pennsylvania, the majority of which were wholesale distributors, reminding them to return TRC’s containers if they had not done so within a year. The card also provided TRC’s toll-free number and email address for additional information or to request replacement shipping labels and/or bin liners.

TRC repeated the mailing in **November 2012**, but to all locations for a total of over 200 pieces.

TRC exhibited at the **February 2012** Johnstone Supply annual meeting held in San Diego. Johnstone Supply is a buying cooperative and annually hosts an invitation-only trade show. TRC staff spoke directly with representatives from many of Johnstone’s Pennsylvania locations during this event. TRC stressed the importance of participation and the potential regulatory consequences for not doing so.

Exhibit 2: Example of New Print Collateral—Vehicle Cling Sticker

In partnership with the Heating, Air-Conditioning & Refrigeration Distributors International (HARDI), TRC re-launched the Mercury Thermostat Recycling Awards in **May 2012**. The award(s) are intended to incent participation in the program by recognizing the distributor(s) that recovered the most mercury thermostats and/or developed innovative strategies to promote the program at their branch location(s).

TRC made several changes following the inaugural 2011 program. To increase participation, TRC branded the award program as the **Big Man on the Planet** award and challenged distributors to, “be in it to win it!” TRC developed custom invitation cards and mailed them to the principals of the 300 plus HARDI members to solicit their participation in the award program. Email solicitations were also sent. To facilitate participation, TRC also printed and distributed custom window clings, counter cards, and flyers to participating locations.

To recognize participating distributors, TRC ran a ¼ page full-color advertisement in the **October 2012** edition of *Distribution Center Magazine*, which was also the “show” issue for the HARDI annual meeting.

The award was presented at HARDI’s annual meeting in **October 2012**.

Exhibit 3: Distribution Center Magazine BMOP Advertisement

Summary of Additional Education and Outreach by Channel

TRC conducted an array of activities intended to raise awareness of Pennsylvania’s mercury thermostat disposal ban, mandatory HVAC contractor recycling, and the ease of compliance through TRC’s collection program.

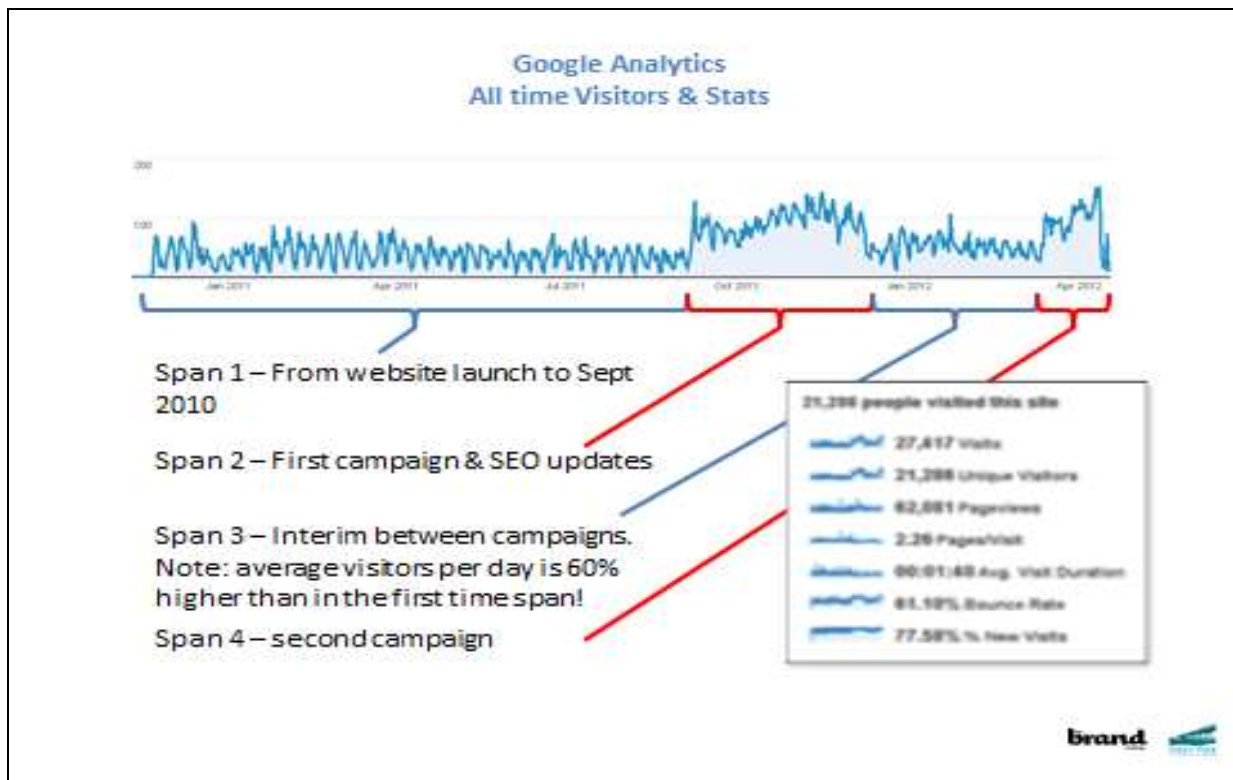

Earned Media—In 2012, TRC continued to enjoy positive and frequent coverage within the industry trade press. TRC issued a number of media releases and most were picked up, generating additional exposure for the program.

Notably, TRC continued to receive coverage in industry leading publications such as The Air Conditioning and Refrigeration News (110,000 circulation) and HVACR Business (circulation

30,000). HARDI ran a two-page article on the program in its *Conference Daily*, provided at no-cost to all attendees of HARDI’s annual meeting.

Website— Website traffic continued to grow in 2012. TRC has nearly doubled the monthly visitors to its site following a search engine optimization in fall 2011, along with other efforts to drive traffic to the site. Exhibit 4 below highlights the results of these efforts. In 2012, Pennsylvania accounted for approximately 6% of TRC’s total website traffic, ranking only behind California, Illinois, and New York in terms of the number of visitors.

Exhibit 4: Website Traffic Increase over Time

Web-based advertising— TRC continued the use of rotating banner advertisements in 2012, albeit with changes in scheduling and scope.

TRC ran web advertisements (Exhibit 5) on the websites *contractingbusiness.com* (160x600 skyscraper) and *hvac-talk.com* (300x250 medium rectangle) during the months of **September, October, November, and December** (four continuous months in 2012, as opposed to two consecutive months in the spring and fall in 2011). Together, the websites average over 2 million pages views and 340,000 unique visitors per month. HVAC-Talk.com, an online discussion community for HVAC technicians, boasts 145,000 registered users. HVAC-talk.com accounted for 5% of annual referral traffic to TRC’s website.

HVAC-talk.com and contractingbusiness.com, published by Penton Media, Inc., serve a national audience. According to their 2013 media kit, 100% of subscribers specify, design, install/service

and/or make product selection for HVAC systems and equipment in residential, commercial, industrial, and institutional buildings.

TRC ran either a 120x600 skyscraper or 728x90 Leaderboard advertisements. The placement generated nearly 30,000 impressions as the newsletter experienced an open rate of over 40%. Copies of the newsletter remain available online continuing to earn TRC exposure.

Google AdWords— In 2011, TRC developed and deployed a Social Media strategy that leveraged the power of Google and the popularity of Facebook. This campaign, which ran from mid-September through early December, geo-targeted contractors and consumers in states with mercury thermostat disposal bans, including Pennsylvania, in an effort to create awareness and increase thermostat collections.

Exhibit 5: Web Banner Advertisement (300x250 fixed image version)

Ads and landing pages were developed with variable messages targeting both audiences. What made this campaign unique is the fact that it was targeted. Advertisements appeared on Google search results pages after an individual searched terms related to TRC’s mission (E.g. thermostat replacement, contracting recycling regulations, mercury thermostat recycling, programmable thermostats, etc.). Similarly, the Facebook campaign targeted users over 18 who "like" industry-relevant topics or organizations (i.e. renovating, renovators, HVAC, HVAC Technicians, home repair, etc.).

In 2012, TRC continued to refine new media strategies to promote the program. TRC implemented a Google AdWord campaign in early spring of 2012 targeting states with mercury thermostat disposal bans, including Pennsylvania. The campaign yielded over 750,000 impressions with nearly 2,000 “clicks” and a click-through rate of 0.26% (a rate consistent with this type of campaign). The conversion rate on the landing page was quite high at 8.3% (“conversion” meaning a visitor clicked on the link to TRC’s collection location search tool on the landing page). During the campaign, Pennsylvania visitors to TRC’s website increased by 275%.

Exhibit 6: Google “Landing Page:

Print Advertisement HVACR Business Magazine— TRC placed a ½ page color advertisement in a special section on thermostats in the April addition.

The purpose of this placement was two-fold:

- 1) Continue to build upon brand/program awareness of other promotional campaigns
- 2) Accelerate the pace of mercury thermostat replacement by helping contractors recognize opportunities to generate additional revenues by proactively replacing older mechanical (mercury) thermostats.

HVACR Business is a national publication with approximately 30,000 qualified subscribers.

Exhibit 7: Advertisement Copy HVACR Business Magazine

Tradeshows—TRC attended and exhibited at the following trade shows relevant to Pennsylvania:

January 23 - 25: AHR Expo. Chicago. AHR Expo is the largest national trade show for the HVACR industry. TRC staff exhibited and promoted the program to HVAC contractors, manufacturers, and distributors. The show had a total registered attendance of over 61,000.

February 21 - 23: Johnstone Supply Annual Membership Meeting. San Diego, California. Johnstone Supply is a cooperative wholesaler distributor of HVAC parts and equipment with 350 locations nationwide. Johnstone's Annual Membership meeting is invitation only and TRC was invited to attend and exhibit as part of an ongoing effort with Johnstone's corporate staff to encourage and expand the cooperative's member's participation in the program. The event is well attended by owners and senior staff and it was a unique opportunity to engage directly with key decision makers.

March 5 - 7: Indoor Air Expo. Las Vegas, Nevada. The show is a part of the Air Conditioning Contractors of America annual meeting. Approximately 700 attendees attended the event.

May 21 - 23: National Association of Oil and Energy Service Professionals. Providence, Rhode Island. OESP's annual convention and trade show with a total of 1,964 attendees representing 309 individual service companies from 14 states. TRC again sponsored this show.

August 23: APR Supply Vendor Show. Hersey, Pennsylvania. This was an invitation-only event sponsored by APR Supply. APR Supply is a leading HVAC wholesale distributor in Pennsylvania and the show attracts over 1,000 HVAC contractor attendees.

September 19 - 21: Comfortech. Chicago, Illinois. Comfortech is a national tradeshow for owners and managers of residential and commercial HVACR, Hydronics/Plumbing contracting firms to see the latest products and equipment.

October 8 - 12: ACCA Building Performance and Service Managers Forum. Austin, Texas. A week-long series of educational seminars focusing on building performance and service managers sponsored by the Air Conditioning Contractors of America. TRC exhibited and sponsored the registration bags.

October 6 - 9: Heating, Air-Conditioning & Refrigeration Distributors International (HARDI). Orlando, Florida. TRC exhibited and participated in the "Booth Program," which provides for 1-on-1 sessions with senior executive staff from HARDI member companies. This event targeted representatives of approximately 80% of the wholesale market for HVACR products. TRC also presented its re-vamped "Big Man on the Planet Award."

Direct Mail— TRC started a direct mail campaign in Pennsylvania in 2012. TRC mailed a full-color postcard (see Exhibit 8) to the principals of approximately 5,000 Pennsylvania HVAC

contracting businesses in **April, May, September, and October**. TRC sourced the list of HVAC contractors from a commercial list supplier.

Exhibit 8: Front & Back of Postcard

Miscellaneous Outreach—It is difficult to categorize and capture many of TRC’s activities in a narrative based report. While paid placements and copy is easy to report, social media and other activities are more difficult to capture. Some good examples of “miscellaneous” outreach include:

- TRC staff was invited by Honeywell International to present two webcasts through its 2012 “elearning LIVE schedule.” The first was entitled “Thermostat Mercury Recovery an Easy way to be Green,” and a second was entitled, “Understanding Health, Safety and Regulations in Managing Mercury Waste.” Archived copies remain available on Honeywell’s website at www.forwardthinking.honeywell.com/training/videos.html.
- TRC continued to encourage the placement of links to its website on member company websites and is pleased to report that links from members such as Honeywell, Emerson/White Rodgers, and Lennox are significant sources of referral traffic to TRC’s website.
- TRC provided Honeywell rights for the use of its updated logo in product collateral. For example, the following was cut from product literature:

<p>Learn More Call toll-free 1-800-328-5111 or visit http://yourhome.honeywell.com Email info@honeywell.com</p> <p>Automation and Control Solutions Honeywell 1985 Douglas Drive North, Golden Valley, MN 55422-3992 www.honeywell.com</p>	 <p>50-9580 RL 2/12 ©2012 Honeywell International Inc. </p>
---	--

- TRC staff made considerable effort conducting direct outreach to senior management of HVAC wholesale distributors in an effort to 1) better integrate the program at their branch locations to ensure staff awareness of the program and program procedures and 2) leverage distributors' position in the channel to promote the availability of the program to their customers.

Program Expenses

TRC is a national voluntary program that is also operating nine mandatory programs on behalf of its manufacturer members. As most promotional activities are run concurrently in multiple states, tracking and isolating expenses specifically to Pennsylvania is not practical. Below is a summary of TRC's national program expenses for 2012. TRC expenses include:

- **TRC Staff and Administration:** Includes staff, office expenses, telecommunications, information technology, office supplies, office lease, and other administrative expenses. Includes staff labor costs to implement Pennsylvania program.
- **Insurance:** Pollution and liability insurance.
- **TRC made \$47,166 in direct incentive payments on behalf of manufacturers as required by Maine and Vermont law.** This does not reflect the administrative costs associated with the incentive program.
- **Travel:** All travel in 2012 and includes travel to trade shows to promote program.
- **Recycling Costs:** All costs (including labor) associated with transporting, processing, and properly managing waste thermostats. Also includes cost associated with fulfilling new bin orders and data entry of bin receipts.
- **New Collection Containers:** Direct cost for new containers ordered in 2011.
- **Marketing/Outreach & Printing:** Includes direct costs to develop and print program collateral; direct mail, national and state advertising, sponsorships, marketing consultants, some web consulting, and other outreach activities. Marketing/Outreach does not include any TRC labor costs.

Evaluation and Program Modifications

Pennsylvania's thermostat law went into effect in January 2009. In comparison to the year prior to the law's passage, collections have increased by almost 100%.

In 2012, TRC missed its goal by approximately 500 units. TRC attributes these results in part to:

Exhibit 9: 2012 Program Administrative Expenses

Program Component	TRC Program
TRC Staff and Administration [†]	\$246,162
Recycling Costs	335,613.25
Insurance	\$2,430
Statutory Incentive Payments	\$47,166
New Collection Containers	\$27,495
Travel	\$25,994
Legal	\$66,303
Direct Expense for Marketing & Outreach	\$169,840
Total (expenses)	\$921,004

- The record warmth of the winter of 2011/2012 impacted the sale of replacement HVAC equipment.
- 2011 returns were influenced by one-time events such as the recovery of hoarded product and an instance where a distributor shipped TRC its obsolete inventory of mercury thermostats.
- The installed base of mercury thermostats continues to decline and there are simply fewer to collect in 2012 than in 2011.

As such, TRC recommends no changes to program goals in 2013.

However, despite the slight decline in collections TRC also has several positives to report.

- HVAC wholesaler engagement continues to improve. Last year TRC was able to target specific distributors at the corporate level and effectively and efficiently engage them. Additionally, TRC found sending reminders to collection sites an effective strategy and will continue this tactic in 2013.
- TRC's new promotional materials have been well received and are effective. TRC has invested significant effort in building its brand and developing collateral that meets the needs of its collection points. TRC aggressively pushed its new cling sticker in 2012 along with its new posters. It is essential the program is visible at the collection points and we believe these materials are making it easy for distributors to promote the program.
- Participation in APR Supply's trade show was a big win for the program. TRC staff spoke with literally hundreds of HVAC contractors at the event.
- For the second year, TRC was able to leverage its brand presence at distributors with its advertising and direct mail. Over the course of the year, Pennsylvania HVAC contractors saw the same message multiple times across multiple channels.

Exhibit 10: Program Goals

Base	7,018	% Increase
2010 Goal	9,500	35.37%
2011 Goal	12,000	35.62%
2012 Goal	13,000	14.25%
2013 Goal	14,000	14.25%
2014 Goal	15,000	14.25%
2015 Goal	15,500	7.12%
Cumulative Increase		120.86%

Looking forward in 2013 TRC's main priorities in Pennsylvania are:

- Building distributor support for the program. The program must be visible and actively promoted at HVAC wholesale distribution locations. TRC wants to see more bins returned from more locations in 2013.
- Educating contractors on the need to make recycling mercury thermostats a priority for their technicians. The message is every mercury thermostat, every time, by all a contractor's technicians.
- Increasing returns from HHW's. TRC staff has engaged with Professional Recyclers of Pennsylvania (PROP) in an effort to increase collections from local governments.

Some changes to the scope and expansion of activities include:

- Continuing direct mail to HVAC contractors 2013.
- Continuing to use a postcard reminding collection locations to ship TRC the bin. The objective is increase the frequency of returns, remind locations of the program (high staff turnover at locations affects continuity of operations), and improve the accuracy of TRC location database.
- Run the Google AdWords campaign for a longer duration.
- Expand the scope and frequency of advertising in HVAC trade press including finding regional publications read by Pennsylvania contractors.
- Targeting specific HVAC distributors on collaborative marketing efforts. This effort not only improves collections through specific distributors but creates competitive pressure within the industry inciting participation.
- Continue the use of a summer intern in 2013 that will, among other projects, work on addressing legacy data issues in the program's location database.
- TRC added staff at the start of 2013 by hiring a full-time marketing and communications person. This allows the program to expand both the scope of its marketing activities and also shift current staff to focus on program operations and customer support, including more active and constant contact with TRC's collection location partners.
- TRC has completed a series of training videos for both collection points (wholesalers) and contractors. These short videos (less than 3 minutes) are posted on TRC's website, Youtube, and other social media. They will be provided to HVAC technical training programs, wholesale distributors and HVAC industry trade groups. TRC also plans on distributing the videos on CD's at industry events and trade shows.

- TRC will more actively use social media as a means to engage with the HVAC industry and promote program participation and recognition.

APPENDIX D: 2012 THERMOSTAT RECOVERY TOTALS BY LOCATION (note—this report rolls all bin receipts into aggregate collections by each location with some exceptions)

Business Type	Company ID	Company Name	City	Number Thermostats	Number Thermostat Switches	Number Loose Switches	Total Switches	Total lbs Mercury
