

Chesapeake Bay Agricultural Inspection Program
September 1, 2016 through March 31, 2017

Total Number of Inspections of Unique Agricultural Operations: 1,125*

Total Acreage Reported as Inspected: 119,000*

Number of Operations Reporting Manure Management Plan (MMP) Information:

Output	Number	Percent
Manure Management Plan is required, as per Chapter 91.36(b)	911 out of 1,125	81% of farms that were inspected are required to have and implement Manure Management Plans
Operation has written Manure Management Plan	636 out of 911	70% of farms that are required to have MMPs were found to have had written MMPs
Manure Management Plan meets the planning requirements (administrative completeness)	587 out of 911	64% of farms that are required to have MMPs were found to have MMPs that met the planning requirements in Chapter 91.36(b) and the Manure Management Manual**
Operations reporting to have received assistance with Manure Management Plan development	473 out of 636	74% of farms that were found to have had a written MMP reported to have received some level of assistance with plan development

Number of Operations Reporting Agricultural Erosion and Sedimentation Control (Ag E&S) Plan Information:

Output	Number	Percentage
Ag E&S Plan is required, as per Chapter 102.4(a)	937 out of 1,125	83% of farms that were inspected are required to have and implement Ag E&S Plans
Operation has written Ag E&S Plan	633 out of 937	68% of farms that are required to have Ag E&S Plans were found to have had written Ag E&S Plans
Ag E&S Plan meets the planning requirements (administrative completeness)	556 out of 937	59% of farms that are required to have Ag E&S Plans were found to have Ag E&S Plans that met the planning requirements in Chapter 102.4(a)**
Operations reported to have received assistance with Ag E&S Plan development	388 out of 633	61% of farms that were found to have had a written Ag E&S Plan reported to have received some level of assistance with plan development

*This does not include inspections or acres of Concentrated Animal Feeding Operations (CAFO) or Concentrated Animal Operations (CAO).

**This represents the percentage of agricultural operations that were found to have met the planning requirements upon initial inspection. Those operations that were found not to have met the planning requirement were placed on the limited time-frame identified in the Chesapeake Bay Agricultural Inspection Program Standard Operation Procedures to obtain and produce the required plans to achieve compliance with planning obligations. If an operation does not comply during the approved time-frame, follow-up activity includes referral to DEP for compliance and enforcement action.
