

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
<div>Green - action has been completed or is moving forward as plannedYellow - action has encountered minor obstaclesRed - action has not been taken or has encountered a serious barrier</div>												
Action #	Description	Performance Target(s)	Responsible Party(ies) and Partnerships	Geographic Location	Expected Timeline	Potential Implementation Challenges or Recommendations	Resources Available		Resources Needed		Annual Progress to Date	Justification for Change
							Technical	Financial	Technical	Financial		
Priority Initiative 1: Preservation of Natural Areas												
1.1	Limit future development in current natural areas		County, Municipalities, PNA Action Team	Countywide	Late 2020 and beyond	Municipal buy-in					<p>2025: County development has been low with the largest threats from large scale solar. The BCPC has hosted workshop for municipalities to educate themselves on best practices for ordinance to ensure inventory and watershed are protected.</p> <p>2024: A preliminary inventory of potential areas has been established. However, there are no known or perceived threats for development or alterations to these areas at this time. As an interim step, BCPD is engaging and working towards development of several land development standards with the intent to limit development is current natural areas.</p> <p>2023: BCPD and the CAP Coordinator initiated efforts to build an inventory of identified locations encompassing the preliminary findings of the PNA team and initial results of field surveys from CMD development where ideally the locations would remain undeveloped and/or potential improvements may be needed to improve natural areas. Intent of the inventory is to assist with one-on-one municipal engagements launched in 2023 for identifying opportunities for further development.</p>	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
<div> <div>Green</div> <div>- action has been completed or is moving forward as planned</div> <div>Yellow</div> <div>- action has encountered minor obstacles</div> <div>Red</div> <div>- action has not been taken or has encountered a serious barrier</div> </div>												
Action #	Description	Performance Target(s)	Responsible Party(ies) and Partnerships	Geographic Location	Expected Timeline	Potential Implementation Challenges or Recommendations	Resources Available		Resources Needed		Annual Progress to Date	Justification for Change
							Technical	Financial	Technical	Financial		
											<p>2022: This initiative and team have merged with the Buffers initiative and team. Overall efforts are driven by taking a more holistic approach to existing conditions and areas; and outlining approaches, engagements, etc. with identified locations with what may work and what the landowner may be receptive to. 2022 efforts focused in the Yellow Creek and Bobs Creek watersheds with the assistance of WPC.</p> <p>2021: This is tied to the prioritization efforts the team is currently working through. Progress is slower than originally anticipated, but still underway. However, this is generally a central message is most outreach materials (e.g. press releases)</p>	
1.2	Promote and assist implementation of Wood and Pollinator Habitat in priority areas	<p><i>Conservation Landscaping – 6 new acres</i></p> <p><i>Urban Forest Planting – 20 new acres</i></p>	BCCD, BCPC, non-profits	Countywide with initial focus on priority catchments	Late 2020 – 2025 (and beyond)	<p>Tight timeframe for significant BMP implementation</p> <p>Long-term verification processes</p>	<p>Local consultants/ engineers</p> <p>Municipalities</p> <p>BCCD</p> <p>Non-profits (WPC, etc.)</p>	<p>NFWF, GG(DEP), EPA, DCNR</p> <p>Municipal.</p>		<p>Full BMP implementation dollars (~\$225,000)</p>	<p>2025: Progress continues to be stagnant.</p> <p>2024: While there is reception to the idea by select landowners, there are no concrete plans to move forward with some of these areas as the perception can also be described also as “that would be great in my neighbor’s yard.”</p> <p>2023: There is general receptiveness to turf-to-meadow type of installations. Several currently proposed projects (e.g. The Green in Bedford Borough)</p>	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
<div>Green - action has been completed or is moving forward as planned</div> <div>Yellow - action has encountered minor obstacles</div> <div>Red - action has not been taken or has encountered a serious barrier</div>

							Technical	Financial	Technical	Financial		
											<div>with funding assistance applications or progressing through preliminary project development stages include meadow-type installations as part of proposed restorations.</div> <div>2022: Turf-to-meadows is proving to be a popular choice and there is general receptiveness. Two “large” sites have been identified for turf-to-meadows and efforts are underway to secure two more sites that have been identified through the catchment assessment/targeting initiative (approximately 8 acres total). Promotion of turf-to-meadows has been included in one-on-one engagements that may be centered around other BMPs (e.g. Bedford Borough Park).</div> <div>2021: Several demo projects were identified (and CAP funds being allocated for conservation landscaping), and there has been a general receptiveness to this approach primarily based on aesthetics.</div>	
1.3	Promote and assist implementation of Urban Tree Canopy in priority areas	Urban Tree Canopy – 2 new acres	Municipalities	Countywide with initial focus on priority catchments	Late 2020 – 2025 (and beyond)	Build on existing urban forest areas	Local consultants/ engineers	NFWF, GG(DEP), EPA, DCNR			2025: See Action 1.1	
							Municipalities	Municipal			2024: See Action 1.1	
											2023: See Action 1.1 Focus has afforded more towards preserving and/or improving larger scale and existing natural areas.	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
<div> <div>Green</div> <div>- action has been completed or is moving forward as planned</div> <div>Yellow</div> <div>- action has encountered minor obstacles</div> <div>Red</div> <div>- action has not been taken or has encountered a serious barrier</div> </div>												
Action #	Description	Performance Target(s)	Responsible Party(ies) and Partnerships	Geographic Location	Expected Timeline	Potential Implementation Challenges or Recommendations	Resources Available		Resources Needed		Annual Progress to Date	Justification for Change
							Technical	Financial	Technical	Financial		
											<p>2022: A higher focus has been afforded towards conservation/preservation of existing large-scale forested areas.</p> <p>2021: This is tied to the prioritization efforts the team is currently working through. Progress is slower than originally anticipated, but still underway. The PNA Action team will most likely merge with the Buffers Action team as efforts are overlapping and this change may help streamline efforts.</p>	
1.4	Promote and assist implementation of Forest, Farm, and Wetland Conservation BMPs in priority areas	<p><i>Farmland Conservation – 3,900 total acres</i></p> <p><i>Forest Conservation – 4,000 total acres</i></p> <p><i>Wetland Conservation – 160 total acres</i></p>	County, BCCD, Municipalities, PNA Action Team, non-profits (WPC, etc.)	Countywide with initial focus on priority catchments	Late 2020 – 2025 (and beyond)	Tight timeframe for significant BMP implementation	Local consultants/ engineers	NFWF, GG(DEP), EPA, DCNR, REAP		Full BMP implementation dollars (~\$725,000)	<p>2025: A number of farms were considered for bargain sale under team farmland preservation program. The program is also look for new ways to administer the program to have a more active program than recent years. Applications are going to be promoted for 2026.</p> <p>2024: Funding for farm preservation is a limiting factor along with resource capabilities to administer a program. No new applications were submitted during the previous year.</p> <p>2023: Funding for farm preservation is a limiting factor along with resource capabilities to administer a program. While still considered a priority and/or desirable action, focus to</p>

							Technical	Financial	Technical	Financial		
Priority Initiative 2: Agriculture												
2.1	Develop a game plan for potential increased efficiencies or nutrient reductions with fertilizer applications	Game plan/approach defined-completed	Ag Action Team, local dealers, farmers	Countywide	Game plan by early 2021	Per the county technical toolbox, the majority of nitrogen applied to agricultural land is via fertilizers (70%)	Local dealers	Penn State, BCCD			Continued verification funding	<div>2025: No significant update.</div> <div>2024: This topic continues to be best described as secondary or downstream of initial engagements during trust-building processes or project development processes with local farmers as of now. It is anticipated this effort and train of thought will continue for several years, but will improve through implementation of projects through ACAP, CEG, and EQIP contracts for manure management improvements and general ag practices.</div> <div>2023: This topic can best be described as secondary or downstream of initial engagements during trust-building processes or project development</div>

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
<div>Green - action has been completed or is moving forward as planned Yellow - action has encountered minor obstacles Red - action has not been taken or has encountered a serious barrier</div>												
Action #	Description	Performance Target(s)	Responsible Party(ies) and Partnerships	Geographic Location	Expected Timeline	Potential Implementation Challenges or Recommendations	Resources Available		Resources Needed		Annual Progress to Date	Justification for Change
							Technical	Financial	Technical	Financial		
											<p>processes with local farmers as of now. The topic is secondary to improved and/or restoring manure management facilities and ag practices in general.</p> <p>2022: The one-on-one engagements approach have continued through several local champions (BCCD reps, BCCD board members, 3rd party on-the-ground specialist, CAP Coordinator, etc.). Organized engagements follow the catchment targeting/assessments approach. Primary engagements thus far have included the Evitts Creek and Yellow Creek watersheds (~35 farms). Engagements include gaining a better understanding of actual fertilizer use versus projected fertilizer use.</p> <p>2021: Primary game plan centered around “large” farmer meetings, but COVID restricted such meetings (some of the Winter meetings were cancelled). Currently relying on one-on-one engagements and personalized communications.</p>	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
Green - action has been completed or is moving forward as planned Yellow - action has encountered minor obstacles Red - action has not been taken or has encountered a serious barrier

							Technical	Financial	Technical	Financial		
											Developing a catchment analysis approach to launch 4 th qtr 2021 with initial focus in the Yellow Creek watershed.	
2.2	Implement and/or capture developed conservation plans into PracticeKeeper		BCCD, NRCS	Countywide	Plan developed by end of 2020; initial imp. In 2021	Ensures capture of implemented BMPs for long-term verification processes Potential time and resource limitations for plan entry	Local agencies, BCCD	CAP Coordinator funding, BCCD funding			2025: BCCD staff continue data entry into PracticeKeeper. 2024: This remains an on-going process, but protocols for a bi-annual data/info “dump” on a sub-watershed to sub-watershed basis (several catchments at a time) for cross-checks and data entry has been established with BCCD personnel. 2023: This is an on-going effort and will be for the foreseeable future. The third-party verifier definitely helped with the overall LTVPs with identification of plans to be entered into PK, but the third-party verifier position is currently open. BCCD staff cross-referencing ag parcel lists from CMD assessments is on-going as well, and the process identifies farms for follow-up for plan checks.	.

		<div>Traditional Cover Crops (12,500 acres/year)</div> <div>Traditional Cover Crops with Fall Nutrients (1,000 acres/year)</div> <div>Prescribed Grazing (1,390 total acres)</div>		coded catchment areas (or where current initiatives are underway)							PracticeKeeper/CAST model. 2024: See Action 2.3 2023: See Action 2.3 2022: Soil health practices (particularly prescribed grazing) have entered one-on-one engagement conversations where appropriate and as a result of catchment targeting/assessment efforts. Through SCWQP development during 2022, approximately 24 opportunities have been identified for improved soil health practices. These efforts will be further pursued as part of the LTVPs and one-on-one engagements process. 2021: There is receptiveness to soil health practices, and several farms are observed/known to implement such practices. However, compliance practices are the primary focus for initial BMPs for implementation. Catchment-to-catchment analyses are intended to inject soil health considerations as part of engagement efforts.

Priority Initiative 3: Riparian Buffers												
3.1	Promote and assist implementation of buffers in agricultural riparian zones in priority areas	Forest Buffer (1,230 new acres) Forest Buffer with Streamside Exclusion Fencing (80 new acres) Grass Buffer (225 new acres) Grass Buffer with Streamside Exclusion Fencing (95 new acres)	RB Action Team, BCCD, non-profit partners, farmers	Contiguous agriculture land use areas, with initial focus on red-coded catchment areas	2021 – 2025 (and beyond)	Farmer resistance or buy-in	Local experts and agencies, non-profit partners (WPC, etc.)	EQIP NFWF		Full BMP implementation dollars (~\$2.07 million)	2025: The buffers mentioned in the 2024 and 2023 updates are all narrow buffers. The potential buffer listed in the 2022 update is unknown. The Town Creek work that was completed in 2025 was a streambank stabilization project with an associated planting that meets narrow forest buffer and (standard) grass buffer requirements. Future streambank stabilization projects should push to achieve land owner acceptance of buffers. 2024: Buffers continue to expand with the Bobs Creek and Yellow Creek watersheds. Progress was made in the Town Creek watershed with a proposed project in the queue. 2023: See Action 2.8. A project currently identified as in preliminary development along Town Creek would include buffers along the main stem and potentially up to 12 tributaries of Town Creek along an approximate 5,500 LF reach. This project is anticipated for further development in 2024.	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
<div> Green - action has been completed or is moving forward as planned Yellow - action has encountered minor obstacles Red - action has not been taken or has encountered a serious barrier </div>

							Technical	Financial	Technical	Financial		
											<p>2022: Buffers a tough sell in the agricultural sector. Collectively, the team leans on WPC and its efforts to date to select farmers for implementation in the agricultural sector. This initiative and associated team has merged with the PNA initiative and team with the intent to focus on non-agricultural areas or truly open space areas that may be on a farm. An anchor project in Juniata Township (approximately 4300 LF of stream) has been identified with receptive landowners across both ag and non-ag parcels. Implementation at this location would serve as a demonstration that contiguous BMPs can be implemented in lieu of isolating improvements to single parcels.</p> <p>2021: Implementation on the ag demo project proved successful. However, buffers in general are a tough sell. The action team has developed an approach for the development and implementation of a “buffer bonus” program, and hope final details are set by the end of 2021 to improve implementation rates.</p>

6.2	Develop, implement, and manage a website with CAP supporting information specific to Bedford County		Educ. Action Team, CAP Coord.	Countywide	Early 2021 and beyond	Long-term website management	Website secured		Website, social media platforms development	\$8,000 (+\$2,000 annually for support)	<p>2025: There are multiple pages of CAP-related info on the BCCD website including many presentations of before/after, construction illustrated in slide shows, etc. There are also similar pages for Dirt Gravel and Low Volume road projects that should be linked to the Cap “mini-site”</p> <p>2024: Individual page within BCCD’s website framework is operational and maintained/updated by BCCD staff.</p> <p>2023: Individual webpage located within the BCCD’s website has worked as an alternative to developing a new website devoted to the CAP.</p> <p>2022: Back-up plan to update the BCCD website was the chosen approach.</p> <p>2021: Development and implementation were highly dependent on the EE grant. The current back-up plan is a self-posted sub-webpage on the BCCD website with links from other county websites.</p>	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
Green - action has been completed or is moving forward as planned Yellow - action has encountered minor obstacles Red - action has not been taken or has encountered a serious barrier												
Action #	Description	Performance Target(s)	Responsible Party(ies) and Partnerships	Geographic Location	Expected Timeline	Potential Implementation Challenges or Recommendations	Resources <u>Available</u>		Resources <u>Needed</u>		Annual Progress to Date	Justification for Change
							Technical	Financial	Technical	Financial		
6.3	Provide oversight and guidance for the Bedford CAP Communications Plan		Educ. Action Team, CAP Coord.	Countywide	Game plan by early 2021 (followed by imp.)	Develop “re-imagined” outreach approaches and messages Determine additional needs, focus areas, etc. for improved messaging					2025: Still “reimaging” 2024: BCPD continues to hold CAP implementation potential as a tool within the toolbox as relationships with individual municipalities grow or continue. 2023: Bedford County Planning Dept. initiated a one-on-one municipal engagement effort in 2023 that has led to exploring opportunities in Southampton Township and West Providence Township. 2022: One-on-one engagements are the primary communications vehicle across all efforts. 2021: Centerpiece of the plan was a website and assistance with messaging from WWTW. One-on-one engagements, press releases, etc. continue.	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
<div> Green - action has been completed or is moving forward as planned Yellow - action has encountered minor obstacles Red - action has not been taken or has encountered a serious barrier </div>												
Action #	Description	Performance Target(s)	Responsible Party(ies) and Partnerships	Geographic Location	Expected Timeline	Potential Implementation Challenges or Recommendations	Resources Available		Resources Needed		Annual Progress to Date	Justification for Change
							Technical	Financial	Technical	Financial		
6.4	Legislator and local government engagement		Educ. Action Team, BCCD, BCPC	Countywide	On-going	Build legislator coalition for long-term support Consider assignment matrix					2025: Each year BCCD creates a Highlights page for projects (CAP & others) which PACD consolidates and shares with legislators. BCCD/CAP Coordinator will pursue opportunities to engage at Township Officials convention. 2024: No major updates for 2024. 2023: Engaged (or receptive) municipalities has increased from one (Bedford Boro) to four through one-on-one engagements. 2022: Receptiveness to overall efforts is still limited to a handful of local supervisors (which we are okay with as this forms the foundation) including Everett Borough, Bedford Borough, and E. St. Clair Township. 2021: A few local supervisors have been receptive to efforts and appear to understand the big picture and needs. BCPC personnel continue to promote efforts and needs with commissioners.	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template

6.5	Organize and facilitate general engagement activities		Educ. Action Team	Countywide	Game plan by early 2021 (followed by imp.)	Bedford Fair, Farmer’s Market, Bedford Chamber, “Legislator’s Breakfast”, Home & Garden Show, etc. COVID restrictions Generate inventory and matrix for events					2025: There was a “barn” meeting held at the Fairground in March 2025 that focused on the cover crop program but also featured a presentation about the stream projects completed on farms and other sites during the last few years. This prompted several producers to ask about potential projects at the close of the meeting and should be rescheduled whenever practicable. Each year BCCD gas a display at the Bedford County Fair that promotes BCCD programs including CAP, ACAP, CEG, etc. The annual township convention in October is another venue for CAP promotion that typically has seen BCCD staff present about the DGLVR program that should also be exploited to promote CAP activities. 2024: Bedford Fair continues to serve as the primary public engagement event on an annual basis. One-on-one engagements are producing ‘fruit’ along with increased receptiveness to stream improvement projects.	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template												
<div>Green - action has been completed or is moving forward as planned</div> <div>Yellow - action has encountered minor obstacles</div> <div>Red - action has not been taken or has encountered a serious barrier</div>												
Action #	Description	Performance Target(s)	Responsible Party(ies) and Partnerships	Geographic Location	Expected Timeline	Potential Implementation Challenges or Recommendations	Resources Available		Resources Needed		Annual Progress to Date	Justification for Change
							Technical	Financial	Technical	Financial		
											2023: Bedford Fair continues to serve as the primary public engagement event on an annual basis. 2022: Bedford Fair is the primary large-scale general engagement activity outside of one-on-one engagements. 2021: Several engagements have been conducted, or CAP-related messaging was involved (e.g. Bedford Fair). However, numerous events have been postponed or cannot go forward (e.g. Home and Garden Show) due to COVID restrictions.	

Phase 3 Watershed Implementation Plan (WIP) Planning and Progress Template

Each county-based local area will use this template to identify:

1. Inputs – These are both existing and needed resources, public and private, to implement the identified priority initiative. These include both technical and financial resources, such as personnel, supplies, equipment and funding.
2. Process – what is each partner able to do where and by when. These are the action items listed under each priority initiative.
3. Outputs and outcomes – both short and long-term. These are the priority initiatives identified by each county. The performance targets are the intermediate indicators that will measure progress.
4. Implementation challenges – any potential issues or roadblocks to implementation that could impede outputs and outcomes.

Asterisk: Place an asterisk next to the action number(s) for action items that appear in both the County Planning and Progress Template and the Programmatic Recommendations Template.

For each Priority Initiative or Program Element: Use the fields, as defined below, to identify the inputs and the process that will be followed to achieve each priority initiative. This is the “who, what, where, when and how” of the plan:

Description = What. This may include programs that address prevention, education, or as specific as planned BMP installations that will address the Priority Initiative. A programmatic or policy effort will require some ability to quantify the anticipated benefits which will allow calculation of the associated nutrient reductions.

Performance Target = How. This is an extension of the Description above. The Performance Target details the unique BMPs that will result from implementation of the Priority Initiative and serves as a benchmark to track progress in addressing the Priority Initiative. Performance Targets may be spread across multiple Responsible Parties, Geographies, and Timelines based on the specifics of the Initiative.

Responsible Party(ies) = Who. This is/are the key partner(s) who will implement the action items though outreach, assistance or funding, and who will be responsible for delivering the identified programs or practices.

Geographic Location = Where. This field identifies the geographic range of the planned implementation. This could extend to the entire county or down to a small watershed, based on the scale of the Priority Initiative, range of the Responsible Party, or planned funding/resources. *NOTE: Resource limitations alone should not limit potential implementation as additional funding may become available in the future.*

Expected Timeline = When. Provide the expected completion date for the planned activity. This should be a reasonable expectation, based on knowledge and experience, that will aid in tracking progress toward addressing the Priority Initiative.

Resources Available: Technical & Funding = This field will note technical and financial resources secured/available to implement the program (Description). This is the total of the resources identified in the County Resources Inventory Template below allocated to the priority initiative as a whole; or, if available, to each action.

Resources Needed: Technical & Funding = This field will note technical and financial resources needed/outstanding to implement the program (Description). This is the total of the additional resources projected and identified as needed in the County Resources Inventory Template below allocated to the priority initiative as a whole; or, if possible, to each action.

Potential Implementation Challenges/Issues = This field will note challenges and issues that may delay program implementation (Description).
