# NPDES PERMIT FACT SHEET INDIVIDUAL SEWAGE

Application No.	PA0205061
APS ID	985477
Authorization ID	1259931

## Applicant and Facility Information

Applicant Name	Mark IV	/ Development, LLC	Facility Name	Raccoon Elementary School STP
Applicant Address	3949 P	atterson Road	Facility Address	3949 Patterson Road
	Aliquipp	oa, PA 15001-1044		Aliquippa, PA 15001-1044
Applicant Contact	Mr. Ant	hony Policastro	Facility Contact	Same as Applicant
Applicant Phone	(412) 9	74-8840	Facility Phone	Same as Applicant
Client ID	320634		Site ID	254794
Ch 94 Load Status	Not Ove	erloaded	Municipality	Raccoon Township
Connection Status	No Lim	itations	County	Beaver
Date Application Recei	ved	January 29, 2019	EPA Waived?	Yes
Date Application Accept	oted	January 30, 2019	If No, Reason	
Purpose of Application		Application for a renewal of a	n existing NPDES permit for	discharge of treated Sewage.

## Summary of Review

The applicant has applied for a renewal of an existing NPDES Permit, Permit No. PA0205061, which was previously issued by the Department on July 10, 2014. That permit expired on July 31, 2019.

WQM Permit No. 491401, issued on April 23, 1991, approved construction of a STP with a design flow rate of 0.00854 MDG. The existing treatment process consists of a comminutor, flow EQ, aeration, final clarifier, sludge holding tank, chlorination, dechlorination, and effluent pump station.

The receiving stream, UNT to Gums Run, is classified as a WWF, and is located in State Watershed No. 20-D.

The applicant has complied with Act 14 Notifications and no comments were received.

## Public Participation

DEP will publish notice of the receipt of the NPDES permit application and a tentative decision to issue the individual NPDES permit in the *Pennsylvania Bulletin* in accordance with 25 Pa. Code § 92a.82. Upon publication in the *Pennsylvania Bulletin*, DEP will accept written comments from interested persons for a 30-day period (which may be extended for one additional 15-day period at DEP's discretion), which will be considered in making a final decision on the application. Any person may request or petition for a public hearing with respect to the application. A public hearing may be held if DEP determines that there is significant public interest in holding a hearing. If a hearing is held, notice of the hearing will be published in the *Pennsylvania Bulletin* at least 30 days prior to the hearing and in at least one newspaper of general circulation within the geographical area of the discharge.

Changes Since Last Permit Issuance: NONE

Comments: The discharge is to an UNT to Gums Run, which flows into the Raccoon Creek Watershed that has a Final TMDL and is impaired by metals and pH. This sewage discharge is not expected to contribute to the stream impairment for which abandoned mine drainage is source of the impairment. No WLAs have been developed for this sewage discharge and they are not expected to contribute to the stream impairment for these pollutants.

## **DMR Violation Summary**

Current eDMR user.

Effluent limit violation summary 3/30/2018 – 3/30/2020:

MONITORING END DATE	OUTFALL	PARAMETER	SAMPLE VALUE	PERMIT VALUE	UNIT OF MEASURE	STATISTICAL BASE CODE
01/31/2020	001	Ammonia- Nitrogen	3.1	3.0	mg/L	Average Monthly

## **Compliance Status:**

Facility had a single DMR violation in January 2020, but no other noncompliance issues.

Completed by: David Roote

Completed date: 3/30/2020

### **Development of Effluent Limitations**

Outfall No.	001		Design Flow (MGD)	0.00854
Latitude	40° 36' 30.00		Longitude	-80º 21' 36.00"
Wastewater De	escription:	Sewage Effluent		

#### **Technology-Based Limitations**

The following technology-based limitations apply, subject to water quality analysis and BPJ where applicable:

Pollutant	Limit (mg/l)	SBC	Federal Regulation	State Regulation
CBOD <sub>5</sub>	25	Average Monthly	133.102(a)(4)(i)	92a.47(a)(1)
CBOD5	40	Average Weekly	133.102(a)(4)(ii)	92a.47(a)(2)
	30	Average Monthly	133.102(b)(1)	92a.47(a)(1)
Total Suspended Solids	45	Average Weekly	133.102(b)(2)	92a.47(a)(2)
рН	6.0 – 9.0 S.U.	Min – Max	133.102(c)	95.2(1)
Fecal Coliform				
(5/1 – 9/30)	200 / 100 ml	Geo Mean	-	92a.47(a)(4)
Fecal Coliform				
(5/1 – 9/30)	1,000 / 100 ml	IMAX	-	92a.47(a)(4)
Fecal Coliform				
(10/1 – 4/30)	2,000 / 100 ml	Geo Mean	-	92a.47(a)(5)
Fecal Coliform				
(10/1 - 4/30)	10,000 / 100 ml	IMAX	-	92a.47(a)(5)
Total Residual Chlorine	0.5	Average Monthly	-	92a.48(b)(2)

## Water Quality-Based Limitations

The following limitations were determined through water quality modeling (output files attached):

Parameter	Limit (mg/l)	SBC	Model
Total Residual Chlorine	0.02	Average Monthly	TRC_CALC
Dissolved Oxygen	5.0	Minimum	WQAM 63
Ammonia			
Nov 1 - Apr 30	3.0	Average Monthly	WQAM 63
Ammonia-Nitrogen			
May 1 – Oct 31	1.9	Average Monthly	WQAM 63

## Best Professional Judgment (BPJ) Limitations

Comments: N/A

## Anti-Backsliding

#### N/A

#### **Additional Considerations:**

For pH, Dissolved Oxygen (DO) and Total Residual Chlorine (TRC), a monitoring frequency 1/day has been imposed. In general, less frequent monitoring may be established only when the permittee demonstrates that there will be no discharge on days where monitoring is not required.

Nutrient monitoring is required to establish the nutrient load from the waste water treatment facility and the impacts that load may have on the quality of the receiving stream(s). A 1/year monitor and report requirement for Total N & Total P has been added to the permit as per Chapter 92.a.61.

Monitoring frequency for the proposed effluent limits are based upon Table 6-3, Self-Monitoring Requirements for Sewage Dischargers, from the Departments Technical Guidance for the Development and Specification of Effluent Limitations.

## Proposed Effluent Limitations and Monitoring Requirements

The limitations and monitoring requirements specified below are proposed for the draft permit, and reflect the most stringent limitations amongst technology, water quality and BPJ. Instantaneous Maximum (IMAX) limits are determined using multipliers of 2 (conventional pollutants) or 2.5 (toxic pollutants). Sample frequencies and types are derived from the "NPDES Permit Writer's Manual" (362-0400-001), SOPs and/or BPJ.

## Outfall 001, Effective Period: Permit Effective Date through Permit Expiration Date.
