

Greater Hazleton Area and Banks Township PA

Good morning!

I am asking that someone please help stop the destruction of our woodlands in this area and someone needs to advocate for the animals being displaced as well as the residents who are under attack by corporate greed. This entire area and all the woodlands are being destroyed by Data centers and Warehouses. Our water, electricity and quality of life are at stake. Our property is being devalued as well as our quality of life.

This is not ok! The infrastructure is not here for this, the traffic will be horrendous, animals are starving and being killed all over the roadways due to loss of habitat. I feel the residents of this area will have a good class action lawsuit to file against the state if this continues.

Please help

Thanks for your time

Jeffrey Payne
