Date: Wednesday, January 4, 2023 10:17:00 AM

Mr. Hershey

The DEP continues to work on the comment response document(s) for the subject project and in doing so, have the following item that needs additional information and/or revision:

- Clarify how the infiltrated volume will be achieved given that the underdrains do not have a valve or other mechanism to prevent the stormwater from discharging through the underdrains. The DEP recommends adding a valve to the underdrain that is to remain closed except to dewater the facility(ies) for maintenance to restore the infiltration capacity or removing the underdrain system entirely. Revise the operation and maintenance notes as needed, if additional appurtenances are added. *[25 Pa. Code 102.8(f)(6) and 102.8(g)(4)]*

Unless the District prefers an alternate method, provide 2 hard copies of any revised or additional documents to the District. Also upload an electronic copy of any revised or additional documents to the DEP's OnBase system (<https://www.dep.pa.gov/DataandTools/Pages/Application-Form-Upload.aspx>). For ease of review, the DEP requests a single upload with multiple files versus a single upload with one large document. **Please do not upload ZIP files.** Use the following OnBase form codes:

Form Name/NO. – Chapter 102 General NPDES Permit (PAG-02)
Resubmittal - No

Thank you.

Best Regards

Nathan Phillips, P.E. | Permits Section Chief
