Ladies and Gentlemen:

The Department of Environmental Protection (DEP) has reviewed the proposed Official Plan revision consisting of a new natural gas power plant to generate peak wastewater flows of 450,000 gallons per day and be served by the Birdsboro Municipal Authority's sewers and wastewater treatment plant. The proposed development is located along Armorcast Road, east of the junction with North Furnace Street.

The plan revision is approved with the following comments:

- 1) All connections tributary to the Birdsboro Municipal Authority's sewage treatment plant must be in accordance with the connection restriction plan as approved by DEP in accordance with Chapter 94 of DEP's rules and regulations. The Authority is ultimately responsible for enforcement of the approved connection restriction plan.
- Prior to accepting wastewater from this project, the NPDES permit renewal application will have to be amended to include this proposed indirect discharger to the municipal sewer system. Please contact Bonnie Boylan at 717-705-4813 or at bboylan@pa.gov.

Mr. Jim Palumbo Birdsboro Power LLC 72 Glenmaura National Blvd. Suite 104A Moosic, PA 18507

RE: Water service to proposed new natural gas-fired electric power facility in Birdsboro Borough, Berks County, Pennsylvania (**REVISED**)

Dear Mr. Palumbo:

Thank you for your inquiry regarding the ability of Reading Area Water Authority ("RAWA") to serve potable water to the proposed new natural gas-fired electric power facility proposed to be located in Birdsboro Borough, Berks County, Pennsylvania.

Subject to negotiation of a mutually acceptable arrangement, RAWA is willing and pleased to become the public potable water provider to the new natural gas-fired electric power facility proposed by Birdsboro Power, LLC. In the portion of the RAWA water system where your facility is proposed to be located, after completion of the required improvements to the RAWA transmission and distribution facilities, we could then provide a flow of between 556 gpm to an upper flow range of 2000 gpm to 2500 gpm. The upper flow range would be provided for a 3 day peak period to address a heat wave or process upset.

Again, thank you for this opportunity. We at RAWA look forward to working with Birdsboro Power, LLC to make this new industrial facility a reality.

Very truly yours,

READING AREA WATER/AUTHORIT
