DEPARTMENT OF ENVIRONMENTAL PROTECTION

On November 26, 2019, Brunner Island LLC, which owns and operates a electric generation facility in East Manchester Township, York County, had a controlled shutdown which caused a 6-degree Fahrenheit change of temperature (during a one-hour period) in its discharge channel to the Susquehanna River. Initial investigation by Brunner revealed no evidence of impact to fish. Brunner will conduct additional investigations and submit a report on the incident to the Department with 10 business days.
